# SharePoint Web Part™

Integrating data with SharePoint has never been this easy!

The RSSBus SharePoint Web Part enables you to quickly and easily aggregate real time information from the web, databases, and other internal and external systems into SharePoint sites.

The Web Part is configured through simple Wiki-style templates with special markup tags that bring in dynamic information. It is similar in appearance and functionality to the standard Content Editor Web Part, but far more powerful.

## USE RSSBUS SHAREPOINT WEB PART TO:

- Access dozens of Enterprise and Internet information sources from SharePoint through an extensive library of data connectors.
- Format and visualize the data output using simple HTML 'Wiki-like' templates.
- Easily download and install dozens of predefined data templates into SharePoint, without server administration or configuration changes.

ACCESS DATA FROM HUNDREDS OF INTERNAL & EXTERNAL SOURCES THROUGH SHAREPOINT INCLUDING:

### Web Services

Amazon S3  
 Amazon SimpleDB  
 Amazon AWS  
 Amazon EC2  
 Amazon SQS  
 Google Gmail  
 Google Calendar  
 Google Search  
 Google Spreadsheet  
 QuickBase  
 Salesforce  
 FedEx  
 Twitter  
 SOAP  
 WebDAV

### CRM Systems

SalesForce  
 Microsoft CRM  
 Sugar CRM

### Databases

MySQL  
 SQLite  
 SQL Server  
 PGSQL  
 Oracle  
 Access  
 QBase  
 VistaDB  
 DB2  
 Firebird

### Email & News

SMTP  
 POP  
 IMAP  
 SMIME  
 NNTP

### E-Commerce

FedEX

### PaymentTech

USPS  
 OFX  
 PayPal

### File Management

SFTP  
 FTP  
 WebDAV  
 Torrent  
 ZIP

### Network Protocols

SFTP  
 SMTP  
 SNMP  
 SOAP  
 WEBDAV  
 FTP  
 HTTP  
 IMAP

### LDAP

NNTP  
 POP

### Office Applications

Access  
 Excel  
 Outlook

### Search

Amazon  
 Google  
 Lucene

### Administration

BizTalk  
 Windows System  
 PowerShell  
 SNMP

and many more...

## NEWS & FEED INTEGRATION

Use The RSSBus SharePoint Web Part to dynamically pull news headlines into your users SharePoint sites. End users define the information filters that they care about directly through the SharePoint Web Part Editor.

## ACCESS REMOTE SERVICES

Connecting to remote services is easy with the RSSBus SharePoint Web Part. Pull local weather information from Yahoo, get stock quotes from NASDAQ or NYSE, integrate Yahoo or Google Mapping, mash-up data from different data sources, and much more!

## DATABASE CHARTING

Monitor sales, response times, server statistics, or any other measurable data from any source: Excel, text files, databases, etc. Through various RSSBus Connectors, end-users can easily connect, retrieve, and visualize data directly from within their SharePoint sites.

# /n software

## /n software Red Carpet Subscription Q1 2009

### Write communications, security and e-business applications.

- Includes components for FTP, IMAP, SNMP, SSL, SSH, S/MIME, Digital Certificates, credit card processing and e-business (EDI) transactions
- New - Windows WF Activities for transferring files, email and more

**IP\*Works!**  
Includes IP\*Works! which is a comprehensive framework for Internet development.

**Internet Communications**  
ATOM, REST, MX, DNS, RSS, NNTP, SMTP, POP, Rexec, Rshell, SMTP, SOAP, Telnet, Ping, TFTP, FileMailer, NetClock, FTP, HTTP and more.

**Secure Components**  
/n software Red Carpet Subscription includes secure versions of many of the IP\*Works! components.

**IBiz Integrator Products**  
Components for Internet payment, accounting, management and other common e-business services.

**Windows Workflow Foundation Activities**  
Includes activities that make it easy to integrate Internet capabilities into your workflow packages.

**Everything in One Subscription**  
There are no technology restrictions, so you get everything. .NET, COM, C++, Java, Pocket PC, UNIX, Linux and even Mac OS X.

/n software Red Carpet Subscription

### One developer, multiple workstations, all /n software products.

/n software Red Carpet Subscription gives you components for every major protocol from FTP to IMAP to SNMP, SSL and SSH security, S/MIME encryption, Digital Certificates, credit card processing, ZIP compression, Instant Messaging, shipping & tracking, e-business (EDI) transactions and robust Enterprise ready Internet connectivity, secure messaging and file transfer for Windows Workflow Foundation. There are no licensing restrictions, so you can code on your work machine, your notebook or even your home machine. Plus there are no technology restrictions, so you get everything: .NET, COM, C++, Java, Pocket PC, UNIX, Linux and even Mac OS X. You receive

quarterly update CDs with free updates, upgrades and new releases. It includes more than \$30,000 worth of software including: all /n software products - IP\*Works!, SSL, S/MIME, S/Shell, Zip, EDI, Amazon Integrators, Fedex Integrators, IBiz Integrators for QuickBooks, Enterprise Adapters, Paymentech, E-Payment, Vital/TSYS, USPS, Workflow Activities etc.

/n software Red Carpet Subscription includes IP\*Works! which is a comprehensive framework for Internet development and is the core building block for most /n software products. IP\*Works! eliminates the complexity of Internet development by

providing easy-to-use, programmable components that facilitate tasks such as sending email, transferring files, managing networks, browsing the Web, consuming Web services, etc. It includes support for all major internet protocols: ATOM, DNS, FileMailer, FTP, HTMLMailer, HTTP, ICMPPort, IMAP, IPDaemon, IPInfo, IPMonitor, IPPort, LDAP, MCast, MIME, MX, NetClock, NetCode, NetDial, NNTP, Ping, POP, RCP, REST, Rexec, Rshell, RSS, SMTP, SMTP, SNPP, SOAP, Syslog, Telnet, TFTP, TraceRoute, UDPPort, WebDav, WebForm, WebUpload, Whois, XMLP and XMPP.

Also included in the /n software Red Carpet Subscription is IP\*Works! SSL which is a suite of secure, SSL-enabled

drop-in replacements for the "classic" IP\*Works! components.

The components are fast, robust, and reliable and consume a minimum of resources. They are small and lightweight with no dependencies on external libraries. Included are native development components for all supported platforms and component technologies. IP\*Works! includes a complete unified framework with a common, easy to learn object model and simplified interfaces allowing you to be more productive. The components are rigorously tested having undergone thousands of hours of testing, you also get reference documentation, hundreds of sample applications and fully indexed help files.

## If Software Installations, Deployments, or Virtualization Is Your Job, Acresso Software Has Your Solution

### InstallShield<sup>®</sup> 2010

How the World Installs Software on Microsoft<sup>®</sup> Windows<sup>™</sup>

InstallShield 2010 makes it easy to author reliable MSI and InstallScript installations and App-V<sup>™</sup> virtual packages for Windows<sup>®</sup> platforms.

#### Optimise Installations for Windows 7

Get a head start on supporting Windows 7 and the new features of Windows Installer 5.

#### Support the Latest Microsoft Technologies

Including App-V, Visual Studio 2008, .NET Framework 3.5, IIS 7.0, SQL Server 2008 SP1, and Windows Server 2008 R2.

#### Install Software on Any Device

Extend installations to configure database servers, Web services, mobile devices, and more.

#### What's New in InstallShield 2010

Includes over 400 new and enhanced features from customer requests, including a revamped IDE, superior IIS tools, virtual machine detection, Unicode support, and much more!

### InstallAnywhere<sup>™</sup> 2009

Install Software on Multiple Platforms with One Installation Project

InstallAnywhere gives software developers a quick and easy way to author professional installations for Solaris, HP-UX, AIX, Linux, IBM i, Mac OS X, Windows, and more.

#### One Project Covers Every Platform

Simplify development by creating a single installation project that works for multiple platforms.

#### Cut Software Development Time

Get products to market faster by creating reliable installations in minutes.

#### Impress End Users with Customised Installations

Impress your end users with a professional, branded installation experience.

#### Lower QA and Support Costs

Cut end-user support costs by significantly improving installation success rates.

#### One Installation for 31 Languages

Create a single installation that automatically translates setup text into 31 languages.

### AdminStudio<sup>®</sup>

How IT Prepares Reliable MSI and Virtual Packages for Error-Free Deployment

AdminStudio makes it easy for IT to prepare reliable MSI and virtual packages for deployment. It has automated tools that speed software through the packaging process.

#### Cut Packaging Time by 70%

Automated tools help you get applications to end users up to 70% faster.

#### Cut Out 60% of Virtual Application Deployment Time

AdminStudio automatically converts MSIs to Microsoft<sup>®</sup> App-V<sup>™</sup>, VMware<sup>®</sup> ThinApp<sup>™</sup>\* or Microsoft<sup>®</sup> App-V<sup>™</sup> virtual packages, saving up to 60% of implementation time.

#### Migrate MSIs to Windows Vista<sup>™</sup> Automatically

AdminStudio can proactively determine which applications are good candidates for migrating to Windows Vista without a second round of repackaging.

#### Works with Any Deployment Solution

AdminStudio supports leading deployment tools such as Microsoft<sup>®</sup> Configuration Manager, Novell<sup>®</sup> ZENworks<sup>®</sup>, LANDesk<sup>®</sup> Management Suite, and much more.

\* Requires separate purchase of VMware ThinApp

## InstallShield 2010 Premier

### Create high-quality Windows Installer, server and mobile installations.

- Choose from 35 runtime languages to customize your installation
- Includes new InstallShield MSI troubleshooting Tools: InstallShield MSI Diff, InstallShield MSI Query, InstallShield MSI Sleuth and InstallShield MSI Grep

InstallShield

### Easily create reliable Windows Installer (MSI) packages and InstallScript installations for Windows platforms, including Vista.

InstallShield Premier is an industry standard tool for ensuring that your Windows software products are correctly installed, configured, updated and eventually uninstalled on your customers' systems.

With support for the latest technologies, significant performance and quality improvements, and functionality that lets you fully leverage the capabilities of Windows Vista, InstallShield Premier is the most robust edition ever. Whether your installations are MSI-based, InstallScript-based, or any other project type, InstallShield Premier has the tools you need to author professional installations optimized for Windows Vista. InstallShield Premier helps you

avoid common installation issues by using the included InstallShield Best Practices Validation Suite. This alerts you if your installation violates any best practices guidelines. InstallShield Premier can also help you maintain a clean build system by using the stand alone build engine, which means you only need to use the part of InstallShield that compiles installations.

Your end user's experience can be improved with refreshed end user dialog designs and localization features. InstallShield Premier's multilingual support lets you create installations for 35 runtime languages from one installation project. InstallShield Premier also lets you easily convert

**Enhanced Windows Vista Support**  
InstallShield is certified for Windows Vista Validation Suite.

**Try and Die**  
This type of trialware also enables your prospective customers to evaluate your product before buying it.

**Dialog Themes**  
Dialog themes are predefined sets of images that give your end user dialogs a unified and distinctive look.

**Setup Prerequisites**  
InstallShield manages prerequisites that must be installed on the target machine before your application can be installed.

**Install Project Types**  
You can create many different project types including MSI, InstallScript, Smart Device, .NET Wizard, Web projects and more.

**Localization**  
InstallShield includes 35 runtime languages.

legacy installations into MSI packages with the included InstallShield Repackager.

InstallShield Premier lets you associate prerequisites with features so you can chain multiple MSIs together in a single installation. It ensures that when your end users install a feature, the prerequisite is also installed (if it wasn't already on their machine). Feature prerequisites are useful for applications or components that are used by only some configurations of the installed product and are not used during the installation itself.

You can easily create trial versions of your products without modifying code. With simple configuration changes, you can easily offer potential customers a fully functional trial version of your

product (after the predetermined trial limit has been reached on an end user's machine, the trial version automatically expires).

InstallShield Premier is the ultimate setup solution for .NET software developers with full support for Visual Studio. InstallShield Premier lets you create your installations within the same Visual Studio interface where you create your products, making .NET install authoring more efficient.

All InstallShield Premier's views are presented within the Visual Studio .NET Solution Explorer in a separate window, so no scrolling is necessary and side-by-side viewing options are available.

# ComponentOne

## ComponentOne Studio Enterprise 2009 v2

### Over 210 components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices.

- Full suite of rich and flexible .NET Windows Forms components
- Rapid development of innovative & demanding Web applications
- Now includes over 30 Silverlight controls

ComponentOne Studio Enterprise

#### Create rich user interfaces for Silverlight, WPF, ASP.NET, Windows Forms, Mobile and ActiveX applications.

ComponentOne Studio Enterprise includes over 210 components for Silverlight, WPF, .NET, ASP.NET, ActiveX & Mobile Devices. It offers a complete solution that targets all runtime environments and all application layers (data, presentation, reporting and transformation).

ComponentOne Studio Enterprise now includes 30 feature packed Silverlight components (grid, chart, menu, treeview, file uploader, layout, data input, gauges, maps, image rotator, navigation and more). You can use expression blend to fully style the Silverlight controls which allows developers to easily create

rich graphical interfaces for their Rich Internet Applications. Built with XAML, the Silverlight controls promote collaboration in your team and fit seamlessly into your developer & designer workflow. Furthermore, you can take XAML from Silverlight and use it in your WPF application.

The WPF toolset includes: Schedule for WPF - a suite of tools delivering scheduling, month calendar and multi-month calendar components for the WPF platform. Chart for WPF - visually stunning 2D/3D bar, area, line, pie and column charts that will bring your WPF application's data to life. Grid for WPF - a set of controls that allow

**Silverlight Themes**  
Includes built-in support for the most popular Silverlight themes.

**ComponentOne Chart for WPF**  
Offers advanced features like OnLoad Animation for 3D Charts.

**ComponentOne PDF for WinForms**  
Now supports AcroForms and AcroFields.

**WebSchedule**  
Experience increased client-side interaction, better performance, styling, a smaller footprint and more.

**ComponentOne Studio for Silverlight**  
Advanced data visualization for your Silverlight applications

**Create Responsive Grid Applications with Built-in AJAX**  
Easily group, sort, filter, resize, and reorder columns at run time, all through simple drag-and-drop.

you to integrate grid functionality into your WPF applications. Reports for WPF - includes a flexible and powerful set of WPF reporting tools: the C1Report, C1PrintDocument, and C1DocumentViewer components as well as the C1ReportDesigner stand-alone application.

The ASP.NET toolset includes eCommerce (PayPal), file format management (PDF, Flash, XLS, ZIP), calendars, charting (2D and 3D), rich text editing, grids, input and mask controls, menus and toolbars, reporting, scheduling and spelling features.

The WebEditor component is a WYSIWYG rich-text editor for ASP.NET, which allows you to edit text in design, source (HTML) and split

modes. It replaces any TextBox with an intuitive Microsoft Word like editor, which enables even non-technical users to easily author and manage HTML content. The customizable toolbar, built-in spell checker and complete JavaScript client-side object model allow you to easily manipulate your text - with or without code.

ComponentOne Studio Enterprise also lets you mimic the look and feel of the iPhone and iTouch user interfaces with components (Button, LaunchPad, Calendar, NavigationList, Slider, SwitchButton, ViewPort) that mimic the look and feel of the iPhone and iTouch when rendered in Mobile Safari.

Silverlight • ASP.NET • iPhone

# RIA - AMAZING

Get the richest set of controls in one great suite. Studio Enterprise 2009 will amaze you with enhanced performance and presentation.

## NEW Studio for Silverlight

- Add style to your UI with built-in support for the most popular Microsoft Silverlight Toolkit themes
- Create graphical navigation with 3D effects using the new C1CoverFlow control
- Import and export RTF files with C1RichTextBox
- Get ahead of the pack with access to the best resources, including 40+ samples with source code for quick learning & online forums

## NEW Studio for ASP.NET

- Experience more interaction on the client-side with new lightweight, high-performance controls
- Create themed and animated apps using dozens of built-in styles & effects
- Eliminate the learning curve with new C1GridView control that mimics the Microsoft ASP.NET GridView control with added features like row filtering, virtual scrolling & more

## NEW Studio for iPhone

- Build iPhone apps using ASP.NET
- Give end-users a familiar experience across Web sites while taking advantage of the iPhone's unique interface

# Developer Express

## DXperience v2009 vol 2

### All Developer Express ASP.NET, WinForms, WPF & Silverlight components & tools.

- User Interface functionality for WinForms, ASP.NET, WPF & Silverlight
- Includes an ASP.NET-AJAX control that displays digital dashboards in your Web based applications

DXperience

All the Visual Studio .NET component suites, libraries and IDE tools produced by Developer Express in one package.

DXperience includes all Developer Express products engineered for Visual Studio and the .NET Framework.

With this subscription, you receive all key technologies by Developer Express including IDE productivity tools, business application frameworks, and components for Windows Forms, ASP.NET, WPF and Silverlight. In addition to the individual tools, you receive complete source code for the Windows Forms and ASP.NET components. With the Universal subscription, you also receive eXpressApp Framework which is an instrument for creating business applications quickly and easily.

**WPF** products include: DXGrid for WPF - fast server-side data processing and complete support for templates and styles, DXCharts for WPF - clear & compact XAML syntax and element customization via templates, DXCarousel for WPF - stunning navigation and data browsing, DXNavBar for WPF - easy and intuitive navigation.

**Silverlight** products include: AgDataGrid - fast data manipulations and rich end user experiences, AgRichEdit - Word like text editing features, AgMenu - static menus, toolbars and context menus etc,

**XtraBars Suite Ribbon Control and Tabbed MDI interface**  
With the XtraBars Suite you can easily build Ribbons from scratch.

**XtraBars Suite**  
You can create application menu, galleries and contextual tabs in ribbons.

**DXGrid for WPF**  
Supports both tabular and card display formats and provides facilities for the end-user to sort and group data.

**AgRichEdit for Silverlight**  
Allows you to introduce Microsoft Word like text editing features into your next Silverlight application with ease.

**XtraReports End-User Designer**  
The XtraReports Suite features a fully functional End-User Designer.

**XtraReports Master-Detail Report**  
With the XtraReports Suite, you can easily build banded reports and even Master-Detail reports.

AgLayoutControl - layout management for Silverlight.

**Windows Forms** products include: XtraGrid Suite - a grid control with four data layout options from a simple table to banded multi-line row layout and card views, XtraScheduler Suite - enables you to incorporate the UI found in Office Calendar within your applications, XtraPivotGrid Suite - a data analysis, mining and visual reporting solution, XtraGauges - linear, circular, digital and state indicator gauge types, XtraEditors a library of over 20 editors that can be used both standalone or embedded, XtraWizard - easily generate multi-step wizard dialogs that fully conform to Wizard 97 or Wizard Aero standards.

**ASP.NET** products include: ASPxGridView and Editors Library - a robust grid and data editors library for ASP.NET, ASPxPivotGrid Suite - a multi-dimensional analysis component, ASPxNavBar Suite - Web navigation bar with full AJAX support, ASPxMenu Suite - an extremely lightweight, customizable main and context menu and more.

Also included in Universal and Enterprise Editions: CodeRush, Refactor! Pro and eXpress Persistent Objects. Priority technical support is also included with updates and upgrades for 1 year.

# BLAZING FAST GRID CONTROLS FOR ASP.NET and WINFORMS

Detail Tabs

The screenshot displays the XtraGrid Features Demo application. The main window has a menu bar with 'Alpha Blending', 'Look and Feel', 'View', 'Print and Export', and 'Help'. Below the menu bar, there are controls for 'Zooming' (set to 'Manual Zoom'), 'Show Detail Tabs' (checked), and 'Enable Detail Tool Tips' (checked). The application is showing a grid with two columns: 'Supplier' and 'Address Info'. The 'Supplier' column is expanded to show details for 'Karkki Oy', including contact information for 'Anne Heikkonen, Product Manager' and the address 'Valtakatu 12, Lappeenranta, Finland'. Below the grid, there are tabs for 'Products' and 'Category'. A 'Customize' dialog is open, showing a preview of a product image (cheese) and its details: 'Category Name: Confections', 'Product Name: Valkoinen', and 'Picture: [Image]'. The 'Address Info' column is also expanded to show details for 'Cooperativa de Quesos Las', including contact information for 'Antonio del Valle ... Export Ad' and the address 'Oviedo, 33007'. The 'Products' column is expanded to show details for 'Queso Cabrales', including 'Quantity Per Unit: 1 kg pkg.' and 'Unit Price: \$14.00 (Sub Total = \$168.00)'. The 'Address Info' column is also expanded to show details for 'Oviedo', including 'Postal Code: 33007' and 'Phone: (98) 598 76 54'. The 'Products' column is expanded to show details for 'Queso Cabrales', including 'Quantity Per Unit: 1 kg pkg.' and 'Unit Price: \$14.00 (Sub Total = \$168.00)'. The 'Address Info' column is also expanded to show details for 'Oviedo', including 'Postal Code: 33007' and 'Phone: (98) 598 76 54'. The 'Products' column is expanded to show details for 'Queso Cabrales', including 'Quantity Per Unit: 1 kg pkg.' and 'Unit Price: \$14.00 (Sub Total = \$168.00)'. The 'Address Info' column is also expanded to show details for 'Oviedo', including 'Postal Code: 33007' and 'Phone: (98) 598 76 54'.

# FarPoint Technologies

## FarPoint Spread for Windows Forms V4.0

### Allow users to easily present, edit and update their tabular data.

- Features Outlook style grouping, right-to-left support, export to HTML/XML and more
- New cell types include list box, multi-column combobox and more

FarPoint Spread for Windows Forms

### Easily present, edit and update tabular data.

Farpoint Spread for Windows Forms is a comprehensive spreadsheet component for Windows Forms applications that combines grid capabilities, spreadsheet functionality and includes the ability to bind to data sources. A single control can handle up to 2 billion sheets, each with up to 2 billion rows and 2 billion columns. Cross-sheet referencing allows calculations to make use of data and formulas on a variety of sheets. Styles and formatting can be applied at the sheet, row, column and cell level. You can control the appearance and the user interaction in a variety of ways. With most of the Spread's appearance and functionality based on underlying models, the developer has complete control over the component.

Farpoint Spread for Windows Forms can handle data from comma-delimited text

files as well as multiple spreadsheets from Microsoft Excel files. The contents of a sheet may be saved as a Microsoft Excel file or stream, text file, or as a Spread XML file. You can bind the control to a data set, such as data in a database, or to anything that the .NET Framework allows, such as an IList object. When you bind the component using the default settings, data from the data set is read into the columns and rows of the sheet to which you bind the data. Columns are associated with fields, and rows represent each record in the data set. You can allow part of your spreadsheet to be unbound and you can also bind to a range of cells. Spread for Windows Forms can also automatically update the data set with the changes.

You can specify the way a user interacts with a cell, including how data is

**Formulas**  
Spread includes over 300 built-in functions and gives you the ability to define your own.

**Cell Types**  
Spread includes many different cell types including: barcode, button, checkbox, color picker, combobox, currency, date time and hyperlink.

**Frozen Rows and Columns**  
With Spread you can freeze both columns and rows at the end or beginning of the sheet.

**Sorting**  
Spread allows the user to click on column headers to perform an alternating ascending/descending sort of the rows in that column.

**Grouping**  
You can group rows or columns into outlines as you do in Excel.

**Desktop Spreadsheet**  
Use Spread to create your own desktop spreadsheet application.

entered, displayed and validated by specifying the cell type. The cell type defines an editor control for the cell that handles data entry, a formatter control to handle how the data is interpreted, and a renderer control that handles how the data is displayed in the cell.

Examples of cell types are check box cell, date-time cell or a simple text cell. Cell types can be set for individual cells, columns, rows, a range of cells or an entire sheet. You can have multiple sheets within a workbook. Each sheet is a separate spreadsheet and can have its own appearance and settings for user interaction. Each sheet has a unique name and sheet name tab for easy navigation between sheets. You can add, remove, copy, insert and hide sheets. You can freeze (make unscrollable) a number of either rows or columns or both in a sheet. You can freeze any number of top rows (called

leading rows) or any number of left-most columns (called leading columns). You can also freeze any number of the trailing bottom rows or trailing right-most columns.

Spread for Windows Forms' Calc Engine includes over 300 built-in functions, supports cross-sheet formula referencing and gives you the ability to define your own custom functions. With formulas, you can: specify a cell reference, use a circular reference, nest functions, recalculate and update formulas automatically, allow the user to enter formulas, create and use a custom name and custom functions.

Formulas include: database, date and time, engineering, financial, logical, math and trigonometry, statistical and text.

What our users liked most about ActiveReports (2009 Poll Results - 100+ respondents)

% of Respondents giving Above Average or Well Above Average in 2009 Survey

Pretty much all our plans involve Data Dynamics Reports, Data Dynamics Analysis, and ActiveReports, plus we may use other Data Dynamics components as they come out. With the time savings and unique capabilities they provide – plus the great support we get from Data Dynamics – these components are a key part of our strategy.

# GrapeCity Data Dynamics

## ActiveReports for .NET V6.0

### The best selling report writer with no runtimes or royalties.

- ActiveReports Designer includes design-time preview tab
- Viewer control now supports annotations
- ActiveReports engine features seven new chart types

ActiveReports for .NET

**Viewer Annotations**  
Annotations can be placed on the report to pass notes and special instructions to users and developers.

**End-User Report Designer Editing**  
Allow end users to edit their reports and save new reports or load old ones.

**Viewing Web Reports**  
The WebViewer control provided in the Professional Edition allows you to write less code and view reports more quickly.

**OLEDB Data Sources**  
ActiveReports for .NET supports any .NET OLEDB data source.

**3rd Party Controls**  
ActiveReports for .NET supports the use of Windows Forms-based 3rd party controls with the report designer.

**Sub Reports**  
With ActiveReports, reports may contain any number of child reports by using the Sub report control.

### Generate a wide variety of reports from your .NET applications.

ActiveReports for .NET lets you easily create reports via the fully integrated designer. It has a familiar user interface and supports C# and Visual Basic .NET. It includes a report creation API with complete runtime access to report objects and members and a fully exposed object model.

ActiveReports for .NET has the ability to host 3rd party .NET controls and user controls within your reports and includes export filters for Adobe PDF, Microsoft Excel, RTF, HTML, text and TIFF formats. It can be used in both Windows based and Web based applications. It also includes a Windows Viewer control that supports split and multi-page views, has a "Table of Contents" pane with a thumbnail view tab and can perform text searches of reports. It also allows you to customize the viewer's toolbar.

The Professional Edition features an end-user report designer control that

allows you to host the report designer in your own applications to provide end users with the ability to create and modify reports. It supports zooming to magnify the design surface of the report for more precise placement and viewing of report controls. It also includes a server-side Web Viewer control that takes advantage of ASP.NET's HTTP handlers to allow you to display reports without having to write custom code.

Reports can be previewed at design time by clicking the preview tab at the bottom of the designer and .NET data components can be dropped directly onto the design surface of a report, resulting in a visual representation of the data component in the new report component tray. This makes it easy to add custom datasets to an ActiveReport at design time.

Other features in ActiveReports for .NET include a chart control (3D area, 3D bar, 3D clustered bar, 3D doughnut,

3D line, area, bar, Bezier, bubble, candle, doughnut, funnel, Gantt, HiLo, OpenClose, Kagi, line, plotXY, point and figure, pyramid, renko, scatter etc.), updated memory management features, a rich text control that is capable of rendering HTML and RTF tables, and an integrated script window with syntax highlighting.

Data access in ActiveReports for .NET is via OLEDB and SqlClient report data sources. It binds to DataSet, DataView, DataTable, any RowCollection and any class that implements the IList interface. The DataSource property can be modified at runtime to create ad hoc (dynamic) reports or reports can be unbound. ASP.NET integration allows quick viewing of reports on the Web with the Web Viewer control. ActiveReports for .NET provides printing capabilities with an ActiveX viewer and Acrobat Reader viewerType properties. It also provides an RPX file HTTP handler, which allows you to place a report on your Web server and make it available via a hyperlink to your Internet

users in HTML or PDF. A compiled report HTTP handler is also provided to allow direct access via a hyperlink to a report compiled in an assembly on your server.

The product is easy to deploy, the reporting engine is a single, managed, strongnamed assembly. Assemblies can be distributed using XCopy or the global assembly cache (GAC).

ActiveReports for .NET comes with a report wizard and a Microsoft Access report conversion wizard so you can start creating reports quickly. It is written in managed C# and provides integration with the Visual Studio .NET IDE. This allows Visual Studio .NET programmers to leverage their current programming language (C# or Visual Basic .NET) when programming with ActiveReports for .NET. The product is based on a per developer licensing scheme, and it is royalty-free to distribute.

Protect your applications with a complete, affordable and adaptable security solution for your business.

In today's business world, companies rely on an increasing number of web applications to collect and exchange sensitive data. More applications mean more places where you're vulnerable and knowing where your weaknesses are can be like finding a needle in a haystack. Unless you have IBM Appscan.

IBM Appscan is an automated solution that tests your web application security and then pinpoints your vulnerabilities. It can also help you manage the process of fixing them. With the threat of hackers always growing, IBM Appscan is designed to readily adapt to these ever-changing dangers - so you can be confident that you're totally secure and completely compliant.

IBM Appscan forms part of the IBM Rational range, which can provide you with complete, end-to-end lifecycle development solutions for all of your software. It makes your life easier and the development process run smoother than ever.

Protect your business. Don't let others find your weakness first.

For ordering and additional information go to:  
[www.componentsource.com/ibm](http://www.componentsource.com/ibm)

Finds where you're  
weakest before  
anyone else does.

# IBM Rational Software

## IBM Rational PurifyPlus V7.0

### Runtime analysis for faster, more reliable code.

- Memory error and memory leak detection, application performance profiling, and code coverage analysis
- Integrates with IBM Rational ClearQuest to create defect reports

IBM Rational PurifyPlus

### Automated runtime analysis tools for Windows-based application performance.

IBM® Rational PurifyPlus™ is a runtime analysis solution designed to help developers write faster, more reliable code. Runtime analysis includes four basic functions: memory corruption detection, memory leak detection, application performance profiling and code coverage analysis. IBM Rational PurifyPlus packages support for all four of these functions in a single product with a common install and licensing system. Designed for Java, Visual C/C++, C#, VB.NET and Visual Basic applications, it provides a complete set of automated runtime analysis tools.

With IBM Rational PurifyPlus, a developer using Microsoft Visual Studio

.NET can do more in their integrated development environment (IDE). The PurifyPlus software has its own menu and analysis results that appear in the IDE user interface. This allows you to easily analyze your code as it is being created - no more switching back and forth between different tools. Because it has its own stand-alone user interface, the IBM Rational PurifyPlus software also supports developers using other IDEs.

IBM Rational PurifyPlus allows you to instrument your entire application or select only portions of it. Selective instrumentation analyzes only the modules that you want considered.

**Purify**  
Runtime analysis solution for memory corruption/leak detection.

**Programming Language Support**  
Rational Purify supports Java, C/C++ and Microsoft's managed and unmanaged languages (Visual C/C++).

**PureCoverage**  
Assess how thoroughly you are testing your code.

**Code Coverage Analysis**  
Identifies untested code to avoid users being the first to exercise functionality.

**Quantify**  
Quantify provides accurate, repeatable performance data for your C and C++ applications.

**Locate and Fix Problems**  
Return performance data for all the code in your application, including system and third-party libraries, shared libraries etc.

This provides greater flexibility for creating the test environment and makes the data collection part of runtime analysis much easier and more productive.

IBM Rational PurifyPlus includes automated runtime analysis tools to improve Windows-based application reliability and performance. Many developers value run-time analysis but are concerned that the effort will slow down their development. The PurifyPlus solution doesn't get in your way. Special instrumentation technology allows you to analyze your executables directly - no recompilation is necessary. IBM Rational PurifyPlus does this for all of the major programming languages, eliminating the need to use multiple tools from different vendors.

IBM Rational PurifyPlus automatically pinpoints hard-to-find bugs and improves execution reliability. It highlights application performance bottlenecks and identifies portions of code subject to performance optimization.

You can install PurifyPlus on your Web server to analyze Java Server Pages (JSP) and Java servlets to improve reliability and performance of server code as well as client applications.

IBM Rational PurifyPlus runs directly inside leading IDEs, as well as stand-alone. It installs and operates directly within WebSphere Studio, Eclipse, Visual Studio .NET and Visual Studio 6.

# Infragistics

## Infragistics NetAdvantage for .NET 2009 Volume 1

### Create commercial class UIs for Winforms, ASP.NET, WPF & Silverlight applications.

- Comprehensive User Interface control and component toolset for .NET
- The xamCalendar and xamCalendarDropDown WPF controls bring a Vista like experience to navigating through dates

Infragistics NetAdvantage for .NET

#### Includes essential User Interface controls for Windows Forms, WPF, Silverlight and ASP.NET, plus application styling.

NetAdvantage for .NET is a presentation layer toolset for quickly and easily building and styling polished application UIs and delivering a great user experience, for WPF, Silverlight, Windows Forms, ASP.NET and Tablet PC. You can deliver user experiences consistent with Microsoft Office and Windows Vista, produce high performance Web applications and create hi-fidelity, cross-platform charts and gauges that instantly provide your audience with a clear understanding of key performance indicators. Designed with the user experience in mind, NetAdvantage for .NET user interface controls give you the ability to focus

on business logic while it takes care of the presentation. Use the modern look and feel of Windows Vista styles and navigation or emulate the Office 2003 and Office 2007 user experiences with predefined color tables and ribbon controls.

NetAdvantage for .NET has what you need to add no-touch AJAX to your Web site with a professionally polished UI. The product includes many Windows Forms and ASP.NET components: grids, charts, combos, desktop alerts, button calculator, dropdown, progress bar, scroll bar, tooltips, editors, gauge, listbar, listview, printing, scheduling,

**NetAdvantage for ASP.NET**  
Gauges and Chart controls let you create an executive dashboard.

**NetAdvantage for Windows Forms**  
Create Outlook style applications with integrated NetAdvantage for Windows Forms controls.

**Create applications with Office 2007 Ribbon styling**  
Also includes grids with conditional formatting, trees, 3D charts, menus, etc.

**PDF Export**  
You can export reports to PDF documents displaying gauges to visually summarize data.

**xamDataGrid**  
NetAdvantage for .NET showing WPF controls xamDataGrid, xamCarouselListBox, xamCarouselPanel.

**Chart Types**  
Display values using columns, pie wedges, cylinders and more using the advanced graphics rendering capabilities in the WPF platform.

spell checker, tabs, toolbars and trees. NetAdvantage for .NET also includes a Document Export Engine for PDF and XPS formats and provides Web crawler optimization, AJAX support and SharePoint integration.

NetAdvantage for .NET includes Silverlight Controls for Line of Business (LOB) Applications which enable you to include islands of richness into your existing Web-based applications, giving end-users an experience that goes beyond what can be accomplished with mere HTML. These controls have been built from the ground-up using the Silverlight 2 platform and take full advantage of its capabilities to help you produce compelling and impactful Web 2.0 applications.

NetAdvantage for .NET includes next generation WPF controls which were designed from the start with an uncompromising attitude toward leveraging its cinematic graphics, rich styling, animation capabilities, and integrated UI virtualization. Embracing templates and exposing numerous styling points gives you complete command over the controls' appearance. A logical, friendly object model makes it easy to take advantage of the WPF platform's potential, whether you choose to do so through declarative UI (XAML) or code.

Multiple volume releases throughout the year continuously add valuable new features ensuring the tools available to you remain leading edge.

# Software FX

## Chart FX 7

### Add interactive charts and images to your Web and Windows applications.

- Totally rewritten to take advantage of Visual Studio enhancements
- Smart Tag Wizard provides a powerful yet familiar interface
- Redesigned UI integrates into Smart Client and ASP.NET applications

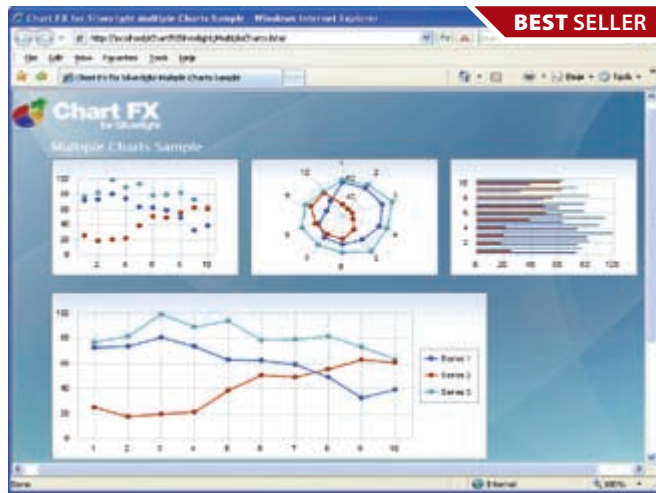

Chart FX 7

Chart FX integrates seamlessly into Visual Studio to provide developers with Enterprise level data visualization capabilities.

Chart FX takes full advantage of the .NET Framework and cutting-edge technologies such as AJAX to create visually-rich, lightweight and secure charts that will enhance your Enterprise application's display layer. Chart FX is compatible with Visual Studio Themes; any changes that you make to a Theme are extended to the Chart FX controls on the page. Developers can also add Chart FX functionality to their Silverlight-based Web applications. Chart FX can bit-stream directly to a browser and includes a DHTML rendering engine that uses AJAX (Asynchronous JavaScript and XML) to produce chart images that allow full interactivity in Web applications. The

DHTML rendering engine automatically updates the chart with the new data without a complete page refresh, only updating the portion of the chart that changed. The charts are fully secure as there are no binary files to download. This allows end users to interact with charts in any browser on any platform, making your application available to a wider audience.

Chart FX supports a variety of data population methods including: passing data directly through the API, resultset binding, XML files, collections, arrays, arrays of arrays, text files and crosstab. It supports over 20 different chart types (bar, Gantt, area, line, step, curve,

**Chart Types**  
Choose from over 20 different chart types including 3D Bar, Area, Bar, Bubble, Financial, Gantt, Line, Pareto, Pie, Radar-Polar etc

**Printing**  
Using the Printer Object, you will have control over margins, paper orientation, color or pattern printing, etc.

**End User Experience**  
Toolbar, context sensitive menus and dialogs provide an easy way for the End User to change visual attributes of any chart element.

**Passing Data**  
Passing data from databases and text files is supported by Chart FX's core objects.

**Multiple Axes**  
When you first create and populate a chart, Chart FX will use a "best-fit" algorithm that accommodates the numerical axis settings.

**Selecting the Chart's Output**  
Chart FX supports a method called RenderToStream that allows the developer to select, among other things, the type of desired output.

bubble, pie, doughnut, pyramid, combination, scatter, financial, surface, contour, radar, polar, statistical, etc.) and includes customizable legends, ready-to-use color palettes, multiple and customizable axes, per-marker attributes, gridlines, background images and border objects.

Chart FX provides run-time data analysis tools for your end users; these include drill downs, tooltips, drag and drop axis configuration and highlighting. Among all these tools, highlighting is a feature that allows end users to position the mouse in any chart element allowing Chart FX to instantly dim out other elements in the chart. This feature allows end users to quickly detect trends and other important elements in the chart.

Chart FX provides developers with advanced charting features with minimal integration effort. Helpful tools like the Chart Wizard, tutorial & samples and a programmer's guide will assist you in creating visually impressive data visualization solutions. Chart FX includes a comprehensive API and properties list allowing you to access complex functionality. It also makes full use of Visual Studio Smart Tags, and takes advantage of this infrastructure to build a fully functional Wizard that allows developers to quickly access Chart FX main features. This Smart Tag Wizard provides the basic datasource configuration option available to other controls in Visual Studio, so you can quickly create and/or connect to an existing database or dataset in your project.

## Telerik Premium Collection for .NET Q2 2009

### Build rich Web/desktop user interfaces and design reports.

- Deliver feature-rich, standards-compliant Web applications
- Visually appealing WPF controls let you create engaging user experiences
- Includes 20+ UI controls that can be used in Silverlight applications

Telerik Premium Collection for .NET

This comprehensive toolset allows you to rapidly build commercial-grade interfaces for Web and desktop applications and meet the diverse functional, design and usability requirements of your clients.

Telerik Premium Collection for .NET allows you to rapidly build commercial-grade interfaces for Web and desktop applications. ASP.NET AJAX, Silverlight and robust WinForms & WPF controls, as well as a flexible reporting engine are there to help you quickly create .NET applications on budget and on time. Telerik Premium Collection for .NET also includes Telerik OpenAccess ORM which lets you simplify the data access plumbing in desktop and Web applications.

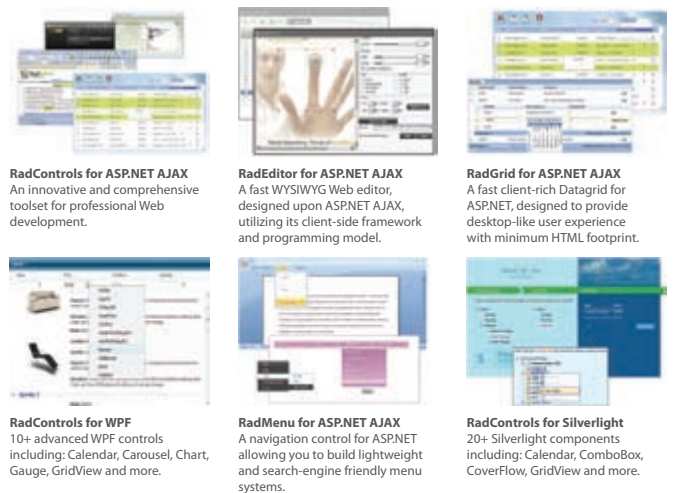

#### What's included (ASP.NET AJAX):

RadCalendar - lightweight calendar control with native AJAX support, multi-view mode, previous/next month and review panes, RadUpload - AJAX-enabled multi-file upload control which uses a proprietary HttpModule

to minimize server memory usage, RadGrid - designed to eliminate the typical tradeoff associated with ASP.NET grid controls' rich functionality at the expense of weight and performance, RadCombobox - a component for building drop-down interfaces, RadEditor - a WYSIWYG rich-text editor that can replace any TextBox with an intuitive Word-like editor. Plus more ASP.NET AJAX components.

#### What's included (WinForms):

RadChart - a lightweight, easy-to-use data presentation component that offers support for all popular chart types, RadGridView - outlook style grouping, filtering, sorting and column reordering, RadCalendar - a lightweight yet highly advanced date input control, RadRibbonBar - provides an easy-to-

**RadControls for ASP.NET AJAX**  
An innovative and comprehensive toolset for professional Web development.

**RadEditor for ASP.NET AJAX**  
A fast WYSIWYG Web editor, designed upon ASP.NET AJAX, utilizing its client-side framework and programming model.

**RadGrid for ASP.NET AJAX**  
A fast client-rich Datagrid for ASP.NET, designed to provide desktop-like user experience with minimum HTML footprint.

**RadControls for WPF**  
10+ advanced WPF controls including: Calendar, Carousel, Chart, Gauge, GridView and more.

**RadMenu for ASP.NET AJAX**  
A navigation control for ASP.NET allowing you to build lightweight and search-engine friendly menu systems.

**RadControls for Silverlight**  
20+ Silverlight components including: Calendar, ComboBox, CoverFlow, GridView and more.

design implementation of the Microsoft Office 2007 "ribbon" user interface. Plus more Windows Forms components.

**What's included (WPF):** Calendar for WPF - with databinding, different views (month, year, decade), culture awareness, flexible date navigation and transition animation. GridView for WPF - with sorting, grouping, seamless editing, filtering and display of hierarchical data. Gauge for WPF - a rich assortment of circular, linear and numeric gauge types with customization capabilities. Plus more WPF components.

#### What's included (Silverlight):

RadComboBox for Silverlight - autocomplete, grid-like multiple columns, databinding, rich events, programming models and full customization capabilities. RadGridView for Silverlight - provides outstanding performance and a flexible hierarchy model. RadGridView for Silverlight packs all advanced grid features such as

grouping, sorting, filtering and rich in-place editing all in one place. Plus more Silverlight components.

**Telerik Reporting** is designed for developers who need a flexible, solid, royalty-free solution to easily design a wide range of reports. The product offers a convenient object model and solid Visual Studio integration which simplifies the generation of Windows, Web and PDF reports. For complete control over viewing reports, Telerik Reporting offers Windows Forms and Web Viewers, which guarantees that you will always get the same look and feel in your reports.

Telerik Premium Collection for .NET also includes comprehensive learning resources with more than 600 demos and 500+ pages of courseware materials and documentation - all available to advance your learning.

# Actipro SyntaxEditor for WinForms

*The ultimate syntax-highlighting editor control for WinForms*

- ◆ Mimics the Visual Studio code editor
- ◆ Create custom language definitions
- ◆ Code outlining and word wrap
- ◆ Indicators (breakpoints, squiggle lines)
- ◆ IntelliPrompt member lists, code snippets, parameter & quick info tips
- ◆ Over 100 stock editing commands

## Optional Language Add-ons

- ◆ Advanced C#, VB and XML languages
- ◆ Automated IntelliPrompt & validation
- ◆ Document outlining & auto-complete

# Actipro Icons for Apps / Web Sites NEW

Over 1,750 unique professionally-designed icons in 10 sets, each in multiple sizes, states, and formats

# Actipro WPF Studio

*Jumpstart your WPF application's UI with over 55 controls*

Bundled suite includes all Actipro WPF controls at one low price:

- NEW **SyntaxEditor (beta)** - Syntax-highlighting code editor control
  - ◆ Ribbon - Office 2007-like UI that meets all Microsoft requirements
  - ◆ Docking & MDI - Docking windows, multiple document interface
  - ◆ Navigation - Navigation and explorer bars, breadcrumbs
  - ◆ PropertyGrid - Blend and VS-like property grid
- NEW **Editors** - Part-based & masked editors w/advanced date/time picker
  - ◆ Wizard - Aero wizard and wizard 97 dialogs
  - ◆ Gauge - Circular, linear, and digital gauges
  - ◆ Bar Code - Vector bar codes with many symbologies
  - ◆ Shared Library - Color pickers, transitions, misc. controls
  - ◆ 1 year of support & free upgrades

# Actipro Software

## Actipro UIStudio Control Suite V2.0

Add Visual Studio style user interface features to your applications.

Actipro UIStudio Control Suite

**Bar Controls**  
Office-style docking toolbars, menus, standalone toolbars and statusbars.

**Dock Controls**  
Docking component with multiple types of MDI support

**Navigation Bar**  
A navigation bar and panel exactly like the ones used in Office.

- Includes commands and links, dockable toolbars, standalone toolbars, popup menus, statusbars and more
- Supports keyboard shortcuts, application modes and MDI

Actipro UIStudio Control Suite contains bar and docking controls which provide the latest look and feel found in Visual Studio. The included bar controls are based entirely on a command/command link design pattern, this makes it easy to make centralized updates to a command that filters through to every instance of a related command link in the user

interface. This also enables UIStudio to support complete run-time customization by the end-user, similar to the features found in Office or Visual Studio. The Dock controls have designer support which lets you manipulate the dock controls in the designer and serialize the layout to code for when the application is executed in run-time mode.

# Aspose

## Aspose.Total .NET Q1 2009

Create, manage and convert many popular document formats.

Aspose.Total

**Aspose.Cells**  
Lets you create and manage Excel Spreadsheets without requiring Microsoft Excel.

**Aspose.Words**  
Lets you read, modify and write Word documents without utilizing Microsoft Word.

**Aspose.Pdf**  
Create PDF documents without utilizing Adobe Acrobat.

- Supports Word, Excel, PowerPoint, Project, PDF and Flash file formats
- Demo written in C# and VB.NET highlight the best practices for implementing many common tasks

Aspose.Total .NET offers every .NET component that Aspose has available as well as all new components released during the annual subscription. Aspose.Total .NET includes a set of components that support the most common document formats like MS Word, MS Excel, MS PowerPoint, MS Project, PDF, RTF, CSV and tab delimited documents allowing

developers to create, manage and convert one format to another.

Aspose.Total .NET also contains components for charting, email, DNS, FTP, ICMP, spell checking, barcode creation, grid and spreadsheet, ad hoc query generation, recurrence patterns and workflow.

# Codejock Software

## Codejock Xtreme Toolkit Pro 2009 Vol 1

Create Office XP - 2007 and Visual Studio .NET style GUI elements.

Codejock Xtreme Toolkit Pro

**Ribbon**  
Create applications with the latest Microsoft Office 2007 style Ribbon Bar.

**Calendar**  
Provides Windows developers with a sophisticated Outlook style calendar.

**Grid sorting**  
Easily create, group and sort data in a flat or hierarchical format.

- Produce Microsoft style ribbon, toolbars, menus and MDI tabs
- Easily theme your application with SkinFramework for .NET
- Includes an Enterprise class grid component with built in toolbar

Codejock Xtreme Toolkit Pro provides Windows developers with a sophisticated set of components to give applications a professional, modern appearance. Included are nine components: Xtreme Command Bars, Xtreme Docking Pane, Xtreme Property Grid, Xtreme Report Control, Xtreme Calendar, Xtreme Task Panel, Xtreme ShortcutBar, Xtreme SkinFramework

and Xtreme Controls. With Codejock Xtreme Toolkit Pro you can create enterprise class applications that incorporate a full set of customizable user interface components that include Office style toolbars and menus. Several popular visual styles are included such as Office XP, 2003, 2007 and Visual Studio .NET.

# Contour Components

## ContourCube V4.0

Interactive reporting, data analysis and reports distribution.

ContourCube

**Hierarchy Objects**  
Once defined, a hierarchy object unites multiple fields with their relative positions into a whole hierarchy as a single dimension.

**Export Reports to Excel**  
ContourCube exports to CSV, HTML, PDF and MS Excel.

**Dynamic Data Filtering**  
Dynamic data filtering, pivot, drill-down and roll-up are all features offered by ContourCube.

- Comprises many popular business and statistical algorithms
- Supports fast direct data loading from multiple sources
- Includes XP, Classic and Flat appearance styles with text wrapping

ContourCube is a high-performance OLAP component for rapid development of Internet, client-server and desktop business intelligence applications. It provides a highly dynamic interface for interactive data analysis, sophisticated analytical, statistical, reporting and graphing features. ContourCube can get data from any data source via ADO, BDE, ODBC or an unbound data source; just drop it onto a form within your project, link it to your data and get the benefits of OLAP. ContourCube performs OLAP operations on hundreds of thousands

of records without an OLAP server. It allows end users to perform OLAP and statistical analyses using current data from any relational database. You can build and print reports interactively - simply with a click and drag & drop (with sub-second response times), dynamically interact with data: move rows and columns, filter data, drill-down, roll-up, pivot table and get all possible reports from one dataset. ContourCube makes millions of calculations simultaneously and shows new subtotals and totals instantly.

# Contour Business Intelligence

Query | Interactive Reporting | Data Analysis | Information Delivery

## ContourCube

*"Add Business Intelligence functionality to your applications"*

**ContourCube** brings embeddable interactive reporting, data analysis and information delivery technology to Windows and Web based business and statistical solutions. It lets user interact with data; slice and dice, pivot, drill down and roll up; with sub-second response times and without additional OLAP server.

**ContourCube** offers a rich palette of business-oriented functions, powerful and easy formula language, and a range of new reporting techniques with innovative approach to report distribution.

## Contour Publisher

*"A powerful and easy-to-use tool for automatic refreshing and delivery of reports"*

**Contour Publisher** is designed to help engineers and managers save time on running queries and updating reports. It can instantly load pre-built reports, feeding these with recent data from your database.

**Contour Publisher** automatically accesses databases, builds new or updates existing reports in Microcube, HTML, Excel, or Word formats, according to the scripts or templates.

## Contour Reporter

*"An easy-to-use application for interactive reporting and data analysis"*

**Contour Reporter** allows executives and managers quick access to business intelligence reports and increases productivity through interactive sales reports, stock, marketing, budget, and accounting analysis. Enterprises and banks easily access corporate reports with **Contour Reporter**.

Governmental organizations, statistical agencies, consulting companies use **Contour Reporter** for publishing corporate performance indicators for their departments and the general public.

# IP\*WORKS!

## NEW VERSION 8.0

The latest evolution of the most comprehensive suite of Internet communications components for professional developers is here!

The highly anticipated IP\*Works! Version 8.0 release represents a leap forward in design, performance, and new functionality! With more than 40+ components supporting every major Internet protocol and development technology, it is easy to see why IP\*Works! is the professional developers #1 choice for connected application development.

Get your copy of IP\*Works! V8 as part of our all-inclusive Red Carpet Subscriptions - [www.componentsource.com](http://www.componentsource.com)

**faster** than a speeding bullet,  
**more powerful** than a locomotive,  
 able to **simplify connectivity** with a single component.

The Professional Developer's #1 Choice for Communications, Security, & E-Business Components

## Internet Communications

### IP\*Works! Products

TCP/IP	Secure SNMP
SSL	Zip
S/MIME	EDI AS2
S/Shell	

Our flagship product line. The result of more than a decade of research and development in building Internet connectivity tools for professional software developers.

**Components for:** Web and Web Services, Email and News, File Transfer, Sockets and Streaming, Remote Access, Instant Messaging, SSL and Secure Shell Security, Certificate Management & Creation, S/Mime Encryption, SNMP Network Management, File & Streaming Compression, and E-Business (B2B).

## Internet Business

### IBiz Integrator Products

QuickBooks	First Data
E-Payment	USPS
E-Banking	FedEx
Vital/TSYS	Amazon
Paymentech	PayPal

The IBiz product line provides small and medium-sized companies with enterprise-class software components for Internet business integration. Built on top of our award winning IP\*Works! tools, these easy-to-use components enable developers to rapidly integrate common business processes.

**Components for:** Accounting Integration (QuickBooks), Credit Card Processing, ACH / E-Check Processing, Shipping and Tracking, Banking & Financial Transactions, and Services Integration.

## Enterprise Adapters

### BizTalk & SQL Server Adapters

AS2 / EDI-INT	GISB / NAESB
SFTP / FTPS	OFTP
XMPP (Jabber)	Secure Shell
SMS Paging	Secure Email
AWS Integration	

The /n software Adapters extend Microsoft BizTalk and SQL Server with advanced Internet communications, security, and e-business capabilities, including robust, highly scalable, fully integrated implementations of B2B messaging and secure communications protocols.

**Components for:** EDI-INT AS2 Integration, Secure File Transfer, Secure Shell Remote Execution, Secure Email, RosettaNet Connectivity, OFTP Integration, NAESB / GISB Messaging, and more.

# Serious Components for Software Professionals

## powerTCP for ActiveX and .NET

PowerTCP components are used by thousands of developers and companies throughout the world to increase productivity and shorten time-to-market.

PowerTCP for .NET components are compatible with all .NET Framework versions 1.x, 2.0, and 3.5. PowerTCP for ActiveX components provide legacy platform support, stability and longevity.

With detailed documentation, hundreds of comprehensive sample applications for Windows, ASP, and ASP.NET, and an expert in-house support staff, Dart provides professional assistance from concept to completion.

**Email Validation, Secure FTP, Secure Mail, SSH, SFTP, Telnet, Emulation, SSL Sockets, Server Tool, Web Tool, Winsock, Ping, and Zip Compression**

## powerSNMP for ActiveX and .NET

### powerSNMP for .NET

Create custom SNMP Manager, Trap and Agent applications with a set of native .NET classes. Full support for SNMPv1, SNMPv2, SNMPv3 and ASN.1 standards.

### powerSNMP for ActiveX

Create custom SNMP Manager, Trap and Agent applications for monitoring and controlling network devices. Full support for SNMPv1, SNMPv2 and ASN.1 standards.

## powerWEB for ASP.NET

### powerWEB File Upload

Interactive, browser-based file upload with progress bars, stream integration, UI customization, multi-file uploads, low server overhead, and more!

### powerWEB LiveControls

An advanced and efficient platform for developing responsive, AJAX-enabled ASP.NET applications. Rapidly develop interfaces with 20 server controls or take advantage of rich client and server APIs for custom client-server communications.

### powerWEB Zoom

Provides cross-browser image panning and zooming without plug-ins! Place high-resolution, interactive images in your website and Zoom handles image delivery on-demand.

### powerWEB TextBox

Incredibly flexible and customizable WYSIWYG HTML editor. Perfect for content management and distributed editing.

PARTNER

# Dart Communications

## PowerSNMP for .NET V4.0

Manage, monitor and control network devices from your .NET applications.

PowerSNMP for .NET

- Agent**  
You can create an application with common SNMP agent functions such as responding to SNMP queries.
- Generate MIB Classes**  
Generate class code for MIBs. This functionality is also built into the Manager and Agent components.
- Trap Catching**  
Create NT services and control them via the Windows services control panel.

- Messages can be constructed using no security, authentication only, or authentication and privacy with SNMPv3
- A Management Information Base compiler dynamically loads MIB files at runtime

PowerSNMP for .NET is a family of .NET classes and components used to manage network devices and remote management information. Full support for SNMPv1, SNMPv2, SNMPv3 and ASN.1 standards provide interoperability with Enterprise devices. The Manager and Agent components provide for message transport and a suite of supporting

classes provide MIB (Management Information Base) information, encoding & decoding and encryption & decryption. MIB files can be parsed and imported into C# and Visual Basic projects to provide full intellisense support. A MIB compiler dynamically loads MIB files at runtime to generate new classes and objects on demand.

# Desaware

## Desaware Licensing System V1.5

Add a cryptographic licensing system to your .NET applications.

Desaware Licensing System

- Create installation codes**  
You can create one or more installation codes. You can copy the codes to the clipboard or save them to disk.
- Assemblies**  
Different types of assemblies across different products, can all be licensed with a single licensing certificate.
- Application select**  
You can select and work on any application from a list of applications defined on the current server.

- Supports timed demo installations and server activation
- No hidden files, registry entries or background services needed
- License an unlimited number of applications at no extra cost

Desaware Licensing System is a cryptographic based licensing system for .NET. It is designed for component licensing per server/machine and is extremely easy to use. It can be configured for both moderate and high security scenarios. Using unique security features in the .NET Framework such as strong named assemblies and XML signatures, the

Desaware Licensing System relies on end to end 128 bit cryptographic techniques, avoiding the use of hidden files, registry entries and other traditional licensing schemes.

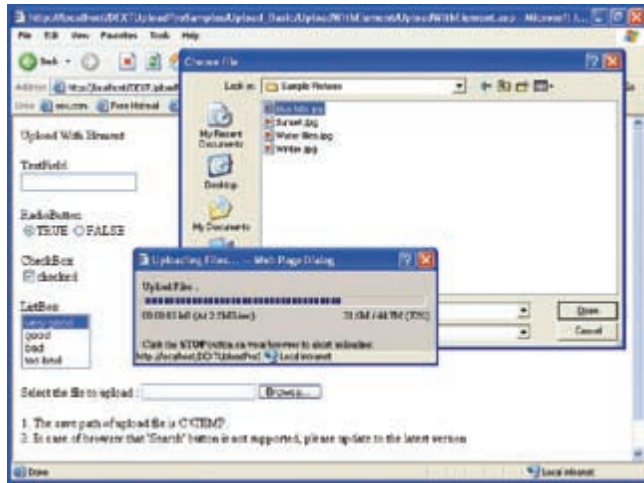

Desaware Licensing System also includes an activation Web service, with a management application (with source).

# DEVPIA

## DEXTUpload .NET Pro V3.7

Add the ability to upload files to your Web applications.

DEXTUpload .NET Pro

**Single and Multiple Uploads**  
DEXTUpload .NET Pro allows you to upload single and multiple files.

**Upload Progress**  
You can display a custom progress bar during the upload process.

**Watermarking and Image Format**  
You can upload and watermark images and change image formats on the fly.

- Allows uploads of upto 2GB files
- Use of optimized parsing algorithm makes uploading speed even faster
- Able to upload files to a database via a BLOB (Binary Large Object)

DEXTUpload .NET Pro is a component that supports file uploads and downloads between a Web browser and an IIS Web server. It observes Internet standards (RFC 1867) and can be used in Microsoft ASP.NET.

DEXTUpload .NET Pro is HTTP-based and uploads files from a Web browser to a Web server quickly and efficiently. It overcomes the limitations of ASP.NET uploading (inconsistency for high capacity file uploads, server overloads and safety, etc.), is written in C# and provides you with improved

upload speeds and stability. During upload and download you can invoke a progress window automatically without installing any other software. The pop-up progress window shows you uploading speed, file size, uploaded file size and time remaining. It can also be customized by using progress objects. DEXTUpload .NET Pro also allows you to watermark uploaded images and convert uploaded images to thumbnails. It supports various file conversion formats (BMP, JPG, GIF etc.) and provides detailed information about image files.

# Dundas Software

## Dundas Chart for SharePoint V2.5

Add advanced charts to your SharePoint projects.

Dundas Chart for SharePoint

**Chart Customization**  
You can use the included wizard to help you set your chart's type, skin, frame and 3D visual effects.

**Data Connection**  
You can easily connect your chart Web part to a data source using the included wizard.

**Chart Templates**  
Chart templates allow you to save various aspects of your current chart including, its appearance and settings.

- Create interactive charts using AJAX functionality
- Uses data from Excel Services and Business Data Catalogs (BDC)
- Create charts entirely on the Web with a chart customization wizard

Dundas Chart for SharePoint provides proven and robust data visualization technology for SharePoint projects. It includes: AJAX interaction, unlimited number of chart (plotting) areas and series, real-time support, line, spline, step line, point, bubble, column, stacked column, 100% stacked column, bar, stacked bar, 100% stacked bar, area, pie, polar, radar Gantt, range,

funnel pyramid, stock, histogram, box error bar 2D and 3D charts.

Dundas Chart for SharePoint consumes data from Excel Services, Business Data Catalog (BDC) or any OleDb data source. Dundas Chart for SharePoint lets you create superior visualizations from your data without having to use Visual Studio.

# How Flexible is Your Licensing Solution?

The licensing solution you choose should adapt to your licensing needs - you should not have to adapt your needs to the licensing solution.

It should integrate easily into your backend systems and infrastructure, and be flexible enough to allow for changes to the licensing model as your market grows.

## The Desaware Licensing System

- Supports demos, time trials and subscriptions.
- Ties into the database of your choice, or use the automatic defaults.
- No royalty or additional fees. License two products or two hundred.
- Detailed instructions on hosting the server software at your site or a low cost hosting service. You are always in control.
- Fully customize system identification and comparison.
- Use the standard .NET component licensing framework or bypass it completely.
- Uses no secret or hidden files.
- Implement tight activation based security or less stringent security scenarios.
- Easily create concurrent licensing scenarios.

Visit [www.Desaware.com](http://www.Desaware.com) to download your copy of "10 Things to Consider When Purchasing A Software Licensing Solution".

# InfoSoft Global

## FusionCharts V3.1

Interactive and animated charts for ASP and ASP.NET applications.

FusionCharts

### Flash Charts

FusionCharts is a Flash charting component that can be used to render data-driven animated charts.

### Variety of 2D/3D Charts Types

FusionCharts offers a variety of customizable 2D/3D charts like: line, area, bar, column, pie, doughnut, etc.

### Cross Browser

FusionCharts is a cross-browser and cross-platform charting solution that can be used with any scripting language.

- Works with any scripting language and runs on all major browsers
- No external ActiveX control or component required to render charts
- AutoFit allows charts to be easily resized to any width and height

FusionCharts is a Flash charting component that can be used to render data-driven & animated charts for your Web applications. FusionCharts allows you to create interactive and professional looking charts quickly and easily. It includes the following chart types: column 3D/2D, pie, doughnut, line, area, stacked, combination charts, bubble, XY Plot and scroll charts. With FusionCharts, you can update charts on client side, invoke JavaScript functions

as hotspot links or make dynamic calls for XML data to the server without involving any page refreshes. All the charts are rendered on the client side using the widely installed Adobe Flash Platform. The server is only responsible for streaming the pre-built SWF files and your XML data files to the end viewer. It can be used with any Web scripting language like .NET, ASP, JSP, PHP, ColdFusion and Ruby on Rails.

# Janus Systems

## Janus WinForms Controls Suite V3.5

Add Outlook style interfaces to your .NET applications.

Janus WinForms Controls Suite

### Office 2007

Janus WinForms Controls Suite offers Office 2007 visual style for all controls included in the suite.

### Janus Schedule Control for .NET

Present appointments and related owners in different views, representing Days, WorkWeeks, Weeks and Months.

### Ribbon Component

Janus WinForms Controls Suite includes a Ribbon control.

- Includes Outlook style grid, calendar view, journal, Ribbon and shortcut bar
- Supports snap lines, base lines, ImageList keys and more
- Unbound mode in GridEX allows you to populate rows using AddItem method

Janus WinForms Controls Suite consists of 100% .NET managed code components that are designed to provide user interfaces for Microsoft .NET applications patterned after Microsoft Outlook. Janus WinForms Controls Suite contains Janus GridEX for .NET (Outlook Grid), Janus Schedule for .NET (Outlook Calendar View), Janus Timeline Control for .NET (Outlook Journal), Janus ButtonBar Control for .NET and ExplorerBar Control for .NET (Outlook Shortcut Bar), Janus CommandManager (Menus

and Toolbars), Janus PanelManager (Outlook / VS.NET panes), Janus TabControl (tab control) and Janus Ribbon for .NET (Office 2007 style Ribbon bar). Janus GridEX for .NET is a data-aware, fully editable grid component that can be bound to any table in a dataset or to any other data source that supports IList, ITypedList or IBindingList interfaces. Janus GridEX for .NET does not sacrifice any group, sort or filter capabilities, when it is bound.

# The web has evolved.

## What about your charts?

FusionCharts Suite helps you build animated charts, gauges and maps to liven up your web applications. Smart, user-friendly and innovative, it lets you add that extra visual edge to your ASP.NET applications.

As our customers say, "It's one thing to shine, another to sizzle".

- ▶ Visually arresting & interactive charts
- ▶ Easy to integrate & deploy
- ▶ Over 75 charts and 500 maps provided
- ▶ AJAX-enabled & drill-down supported
- ▶ Trusted by over 12,000 customers and 250,000 users

## Convey better. Convince better.

[www.componentsource.com/features/infosoft/index.html](http://www.componentsource.com/features/infosoft/index.html)

## Janus WinForms Controls Suite

Add powerful Outlook style interfaces to your applications

### Janus GridEX for .NET

Janus GridEX is a control capable of working in bound fashion with ADO.NET or IList data sources. The control supports hierarchical display of data and permits you to create effective user interfaces similar to Microsoft Outlook®, while easing development and maintenance time. The functionality provided by the control allows you to display, format, edit, sort, group, filter, manipulate, summarize, preview and print your data. Standalone MaskEdit, MultiColumn Combo, and UpDown controls are also included.

### Janus Ribbon & Command Manager Controls

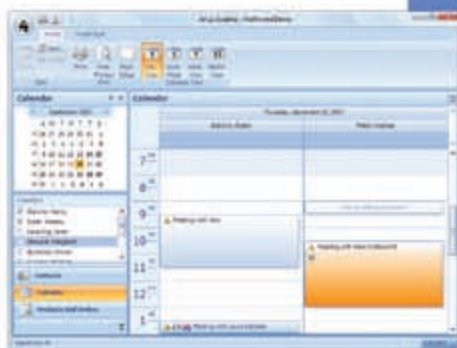

Janus Command Manager and new Ribbon controls are also included in the suite. These controls provide Windows developers with stylish menus and toolbars. The components permit advanced customization of the menus and toolbars of your applications. Use the built in VisualStyles in the controls to easily provide your applications with a look similar to Windows XP, Office 2000, Office XP, Office 2003 or 2007.

### Janus Timeline Control for .NET

The Janus Timeline Control is ideal for displaying items in relation to time. Items in the control are arranged in chronological order from left to right on a time scale that can be divided from seconds to years. You can easily load, display, format, group, filter, edit and manipulate items with the functionality available in the control in both bound and unbound modes.

### Janus Schedule for .NET

The Janus Schedule control can present appointments and related owners in different Views, representing Days, WorkWeeks, Weeks, and Months. The control also supports working with recurrent appointments. You can easily load, display, format, filter, edit, manipulate, preview, and print appointments with the functionality available in the control in both bound and unbound modes. A stand-alone Janus Calendar Combo Control, used to edit date and time values, is also included.

### Windows Forms Controls

A suite of controls designed to provide powerful user interfaces for Microsoft .NET Smart Client applications patterned after Microsoft Outlook®. All of the controls in the suite are 100% C# managed controls designed to be used with Visual Studio® 2005.

Janus WinForms Controls Suite includes the following controls:

Janus GridEx for .NET  
(Outlook Grid)

Janus Schedule for .NET  
(Outlook Calendar View)

Janus Timeline for .NET  
(Outlook Journal)

Janus ButtonBar for .NET  
(Outlook Shortcut Bar)

Janus ExplorerBar for .NET  
(Outlook Shortcut Bar)

Janus UI CommandManager  
(Menus and Toolbars)

Janus PanelManager  
(Outlook / Visual Studio .NET panes)

Janus TabControl  
(Tab Control)

### NEW!

All controls now feature Office 2007 look & feel plus Ribbon Bar

# LEAD Technologies

## LEADTOOLS Imaging Pro SDK V16.5

Precision image control - used by Corel, HP, Kodak and Microsoft.

LEADTOOLS Imaging Pro SDK

**Image File Formats**  
Load and save files in many different raster file formats.

**Compression Support**  
Compress images into lossy or lossless image formats, using market-leading compression techniques.

**Spatial Image Manipulation**  
Complete image resizing control after and during loading. Perfect for single image and batch resize applications.

- Includes API, .NET Class, C++ Class Library, ActiveX and VCL toolkit
- Load, save and convert over 150+ raster image file formats
- Supports TWAIN, screen capture and database connectivity

LEADTOOLS Imaging Pro SDK is a .NET Class Library, C++ Class Library and DLL Imaging API SDK with support for 150+ raster file formats (JPEG, GIF, TIFF...), image processing with 2000+ effects, Image transforms and filters, extensive loading and viewing options, TWAIN scanning, printing, thumbnail browser, Internet and database imaging functions,

compression, screen capture, drawing, color conversion, graphics conversion, common dialogs, etc. It also includes digital paint functionality for developers who need to incorporate paint capability into their applications. The included LEADTOOLS Tile Image Viewer, enables you to add fast, interactive image viewing into your ASP.NET 2.0 Web applications.

# Neuron

## Neuron .NET Vision Professional 2009 Vol.1

Create powerful data presentation applications with data visualization capabilities.

Neuron .NET Vision

**Neuron Chart**  
Professional quality charts with support for full set of charting types, advanced lighting, axes customization, labels etc.

**Neuron Gauges**  
Full set of Radial and Linear Gauge types, numeric display panels.

**Network Diagram**  
Integrate and display sophisticated diagrams in your .NET WinForms and WebForms applications quickly and easily.

- Includes advanced charting, diagramming and UI components
- Makes visualization of complex data easy and comprehensible
- All components fully support Visual Studio 2008 and .NET Framework 3.0/3.5

Neuron .NET Vision is a suite for creating powerful data presentation applications with data visualization capabilities. The Suite features Neuron Chart for .NET (business, scientific, financial or presentation charting or even full featured, integrated BI solutions), Neuron Diagram for .NET (shapes, automatic layouts, visual effects, etc.) and Neuron User Interface

for .NET (a rich docking library, extensible command bars and a set of extended Windows Forms controls designed to bring the latest GUI standards to your applications). The well designed object model, numerous features and quality presentation makes the visualization of complex data easy and comprehensible.

# LEADTOOLS®

The World Leader in Imaging Development SDKs

.NET, WPF, WCF, WF, C API, C++ Class Lib, COM & more!

VERSION  
16.5

## Document

## Medical

## Multimedia

## Vector

Develop your application with the same robust imaging technologies used by **Microsoft, HP, Sony, Canon, Kodak, GE, Siemens, the US Air Force and Veterans Affairs Hospitals.**

LEADTOOLS provides developers easy access to decades of expertise in color, grayscale, document, medical, vector and multimedia imaging development. Install LEADTOOLS to eliminate months of research and programming time while maintaining high levels of quality, performance and functionality.

- **Image Formats & Compression:** Supports 150+ image formats and compressions including TIFF, EXIF, PDF, JPEG2000, JBIG and CCITT.
- **Display Controls:** ActiveX, COM, Win Forms, Web Forms, WPF and Silverlight.
- **Image Processing:** 200+ filters, transforms, color conversion and drawing functions supporting region of interest and extended grayscale data.
- **OCR/ICR/OMR:** Full page or zonal recognition for multithreaded 32 and 64 bit development.
- **Forms Recognition and Processing:** Automatically identify forms and extract user filled data.
- **Barcode:** Detect, read and write 1D and 2D barcodes for multithreaded 32 and 64 bit development.
- **Document Cleanup/Preprocessing:** Deskew, despeckle, hole punch, line and border removal, inverted text correction and more.
- **PDF and PDF/A:** Read and write searchable PDF with text, images and annotations.
- **Annotations:** Interactive UI for document mark-up, redaction and image measurement (including support for DICOM annotations).
- **Medical Web Viewer Framework:** Plug-in enabled framework to quickly build high-quality, full-featured, web-based medical image delivery and viewer applications.
- **Medical Image Viewer:** High level display control with built-in tools for image mark-up, window level, measurement, zoom/pan, cine, and LUT manipulation.
- **DICOM:** Full support for all IOD classes and modalities defined in the 2008 DICOM standard (including Encapsulated PDF/CDA and Raw Data).
- **PACS Communications:** Full support for DICOM messaging and secure communication enabling quick implementation of any DICOM SCU and SCP services.
- **JPIP:** Client and Server components for interactive streaming of large images and associated image data using the minimum possible bandwidth.
- **Scanning:** TWAIN 2.0 and WIA (32 and 64-bit), autodetect optimum driver settings for high speed scanning.
- **DVD:** Play, create, convert and burn DVD images.
- **Multimedia:** Capture, play, stream and convert MPEG, AVI, WMV, MP4, MP3, OGG, ISO, DVD and more.
- **Enterprise Development:** Includes WCF services and WF activities to create scalable, robust enterprise applications.

# The Imaging Source

## TX Text Control .NET Server V15.0

Generate word processor documents on an HTTP server.

TX Text Control .NET Server

**XML Programming**  
TX Text Control XML mode enables non-technical end-users to create valid XML documents.

**Multi-Language Support**  
TX Text Control is shipped with dialog boxes that are translated into English, German, French, Spanish and Italian.

**PDF/A-1b**  
All supported TX Text Control formats can now be exported to PDF/A-1b.

- Create press-ready, password secured, encrypted Adobe PDF files
- Include complex nested tables, headers, footers and images
- Supports XML, PDF, CSS, RTF, HTML, DOC, ANSI, Unicode and more

TX Text Control .NET Server is a server side component that can be deployed on Microsoft Internet Information Server. It is a fully programmable ASP.NET word processor engine that offers an extensive palette of word processing features.

end user applications that generate documents on-the-fly, using data from databases, binary files (Microsoft Word), ASCII files (XML, RTF, HTML) and image data (JPG, PNG, BMP, TIF, GIF, WMF).

Using TX Text Control .NET Server, programmers can develop server side,

Output is sent to an HTTP stream or to a file, without displaying anything on the server monitor.

# Xceed Software

## Xceed Ultimate Suite 2009

65+ advanced UI controls and data manipulation libraries, for COM, .NET, CF, WF, WPF and Silverlight.

Xceed Ultimate Suite

**Xceed Upload for Silverlight**  
Supports uploading multiple files in a single transaction, and supports GZip and Deflate, with controllable compression.

**High-quality, fast ASP.NET 2D/3D chart control**  
Supports 14 major 2D/3D chart types, flexible axes, scaling, legends, drill-down, etc.

**Xceed DataGrid for WPF**  
Features include hierarchical master-detail; 12 flexible, themed editors; an interactive Cardflow 3D view and more.

- Includes all Xceed's .NET, CF, WPF, WF, Silverlight, COM and ActiveX components
- 1 year Vanguard subscription includes free updates, free upgrades, all new Xceed product releases and priority support

Xceed Ultimate Suite offers both User Interface tools for application front-ends and data handling libraries for application back-ends.

(Silverlight, .NET, ASP.NET, CF, ActiveX) and binary encoding (ActiveX).

Xceed Grid for .NET (included in Xceed Ultimate Suite) comes with 120+ features: grouping, master/detail, Vista, XP and Office theming, fixed rows and columns, Excel export, gradient maps, interactive visual styles and cell UI virtualization.

The Suite includes functionality for compression (Silverlight, .NET, ASP.NET, CF, ActiveX), encryption (ActiveX), user interface (WPF, .NET, ASP.NET, ActiveX) data manipulation (WF), file transfer

# .NETXPERT

## InfoScope V2.5

Easily post InfoPath forms to a Web server.

- Interoperable with all kinds of .NET based Enterprise solutions
- Includes Windows SharePoint Services (WSS) support

InfoScope

InfoScope is an InfoPath run time engine that enables users who don't have InfoPath to use InfoPath forms through a Web browser. InfoScope enables inputs and updates of data within InfoPath, and makes the entire process interoperable with a back end system via a Web browser.

InfoScope provides a Service Oriented Architecture (SOA) which meets various different types of complicated business requirements through .NET technology. This enables customers and/or partners to integrate into

your business processes via online electronic forms.

InfoScope also provides an InfoScope SharePoint Web Part Control. It's a real InfoPath form not a Web page. No roundtrip and no modification. Just publish and you are ready to use InfoPath. Since InfoScope is auto-installed to clients, you won't meet deployment issues.

InfoScope also enables Web pages to catch events so that you can develop Web applications using InfoPath forms.

# Accusoft Pegasus

## ImagXpress Standard V9.0

Add comprehensive document imaging to your applications.

- Image viewing, editing, printing, scanning, file conversion and more
- Includes a wide range of very fast image processing functions
- Sample code for: .NET, VB, Delphi, VC++, C++ Builder, HTML, Access

ImagXpress

ImagXpress Standard is ideal for document imaging and forms processing application development.

ImagXpress Standard delivers single and multi-page TIFF support, embedded-image PDF support, TIFF tag handling, EXIF tag handling, file conversion, and support for 1 to 16-bit images. It also provides sophisticated

TWAIN scanning support, image editing and clean up (including image binarization, thresholding, anti-aliasing, deskew, despeckle, line removal, hole punch removal, blank page detection, scale to gray, save as grayscale, crop, rotate, scale, zoom), annotation/redaction capabilities and advanced printing capabilities beyond Internet Explorer.

 MULTI-TALENTED COMPONENTS

# ActsOne

## BlueOne Components for Flex Builder 3

Add diverse Adobe Flex UI functionality to your Web site.

- Includes grid, grouping, tree, totaling, calculation, input, menus, navigation features and more
- Extends Flex component functions

BlueOne Components

BlueOne Components are custom UI components, developed by ActsOne using Action Script 3.0, with rich functions to make Adobe Flex applications more useful. It showcases many effective, easy-to-use, rich components such as BlueDataGrid, Blue MDI Window and BluePanel. BlueDataGrid in particular has many functions including multi header, data merging, tree datagrid, OLAP grid, Excel export, totaling and sub totaling features. BlueOne Components includes support for Flex based PDF,

Word and Flash reporting and supports an integrated Web UI as well as an easy-to-use editing environment.

Other features include: skin and interface generation an extended textbox, easy data grid cell extending, performance implementation, automatic cell calculation, cell drill-down functions, column splits, MDI (Multiple Document Interface Window) and an extended tree & button control.

## Btrieve Classes for .NET V3.0

Fast, easy to program access to Pervasive.SQL databases from .NET.

- Provides direct access to Pervasive's transactional interface from within .NET
- Extended class enables maximum performance when searching Pervasive data

Btrieve Classes for .NET

Btrieve Classes for .NET is a set of .NET database access support classes that enable fast, easy to program access from .NET programs to Pervasive.SQL databases via the Btrieve API. As such they greatly help developers looking to write .NET programs accessing data in Pervasive.SQL databases or those looking to migrate existing pre-.NET Btrieve/Pervasive applications to .NET.

This product includes two types of class library the first (DDF Class) is specifically designed for the .NET Framework and is composed of classes that enable smart and efficient access to column data and definition of data type conversion code. The second type of class (Native Class) provides Btrieve API level access from .NET managed code.

Btrieve Classes for .NET performs with greater efficiency and hence is faster than ADO.NET or Pervasive's OLE DB provider.

Btrieve Classes for .NET includes full support for Pervasive PSQL v9 and Visual Studio.

# Aurigma

## Aurigma Image Uploader ActiveX V5.7

An easy and convenient way to add Image uploading functionality to your site.

- Ideal for digital photo print ordering sites
- Memory friendly even for huge numbers of uploaded files and can allow both multiple and single file selection

Aurigma Image Uploader

Aurigma Image Uploader ActiveX is a control for IE which lets you upload images and other files in a very user friendly way. It is a client-side ActiveX control which allows you to upload and navigate through the images on a client computer, perform basic image processing (generate thumbnails, rotate), edit descriptions of images and then upload them to a server.

It dramatically increases the efficiency of uploading images to a server compared to standard input type='file' elements. Non-image files can also be uploaded. It retrieves data from the server in standard multipart/form-data format, so files can be handled by any script or platform: ASP, ASP.NET, Perl, PHP, ColdFusion, JSP, etc.

## Change Vision

### JUDE/Professional V5.5

Business process UML modeling tool.

- Edit model information directly, without opening dialog boxes
- Supported diagram types include Class, UseCase, Sequence, Collaboration, StateChart, Activity, Component and Deployment

JUDE/Professional

JUDE includes basic features to make modeling simple and user friendly. JUDE is suitable for business use, handling large-sized models and document creation. It includes enriched features, such as the ability to change your view freely using a map view, zoom by dragging, unlimited undo/redo, the ability to output project information to a CSV file, automatic generation of class diagrams with model information, diagram creation guidance and more.

JUDE supports basic UML 1.4 diagrams including: UseCase, Sequence, Collaboration, Statechart, Activity and Class (Object/Package/Robustness). You can lock project files from other users, set the font for the whole project file and configure print settings for each diagram. JUDE also lets you display multilingual aliases (e.g. English and Japanese) on diagrams, export diagrams to RTF and HTML documents and generate Class diagrams from Class files.

## Bennet-Tec Information Systems

### MetaDraw WinForms for .Net

Add Object Oriented image components to your .NET applications.

- Create, edit, display and save pictures built from a set of graphic objects
- Support for Object Oriented editing: moving, sizing, change colors and other attributes

MetaDraw WinForms for .Net

MetaDraw for WinForms .Net is an easy-to-use, robust Object Oriented image component that has been completely rewritten to take advantage of the infrastructure provided by .NET. MetaDraw for WinForms .Net lets your users create and move shapes and images, link objects by diagram lines, draw out floor plans, recognize shapes, identify drawn elements, dynamically

manipulate image layout, recognize clicks and drags on specific graphic elements, link data to individual hotspots and more. It includes the following features: OLE drag and drop, multi-step undo/redo support, JPG, PNG, EMF format support, save/load pictures to/from database fields, zoom support for lines, arcs, poly lines and more.

## Chant

### Chant Developer Workbench 2008

Comprehensive development and testing environment for working with speech.

- ActiveX, CDLL, COM, Java, .NET, VCL, Web, Win32 and WinCE libraries
- Supports Dragon, ViaVoice, SAPI, and VoCon recognizers
- Supports Acapela, Cepstral, RealSpeak Solo, & SAPI synthesizers

Chant Developer Workbench

Chant Developer Workbench is comprised of tools and components for developing software that speaks and listens. As an interactive toolset, it provides a development and testing environment for working with the component libraries and the speech technology objects they manage. With component libraries, you can manage grammars, lexicons,

profiles, recognizers, synthesizers, and text-to-speech markup directly within application software you develop and deploy. Within the Chant Developer Workbench interactive environment, you can create, edit, and test grammars, lexicons, profiles, and text-to-speech markup to deploy with your applications.

## ComponentArt

### ComponentArt Web.UI for ASPNET AJAX 2009.1

Advanced user interface suite of ASP.NET AJAX controls.

- Delivers fast, lightweight and feature-rich user interfaces
- Client-side API featuring Microsoft AJAX library syntax allows for total control over structure and data, with persistence to the server

ComponentArt Web.UI for ASPNET AJAX

ComponentArt Web.UI for ASP.NET includes 22 user interface controls for the development of sophisticated Web applications.

It includes the following AJAX controls: Calendar, CallBack, ComboBox, Dialog, Editor, Grid, Menu, MultiPage, NavBar, Rotator, SiteMap, Snap, SpellCheck, Splitter, TreeView, Upload and WebChart Lite. All controls are built

on the client-side component model introduced by ASP.NET AJAX, exposing JavaScript APIs that allow full client-side programmatic control over any part of the user interface.

ComponentArt Web.UI navigation controls (Menu, TreeView, NavBar, TabStrip and SiteMap) provide meaningful content to search engines by generating a crawler friendly representation of the navigation.

## Crownwood Software

### DotNetMagic V6.0

Create Microsoft Office style applications in minutes.

- Provide Visual Studio style docking windows with docking indicators
- TabbedGroups control provides flexible, customizable MDIs
- Includes Windows Media Player style rendering

DotNetMagic

DotNetMagic user interface library provides Office 2007 style rendering including the blue, silver and black Office schemes. It also has a docking window system that offers all the features found in Visual Studio .NET. It mimics the appearance of Visual Studio .NET and features; multiple content in the same row or column, multiple content inside the same docking window, the ability to restore windows in the same row or column and an auto hide capability. The TabbedGroups control provides a similar ability to organize documents

as found in Visual Studio .NET. The window docking features include: edge docking, floating, pinnable, sliding auto hide and hide & show. The customizable Tree control includes: none, single or multi-select modes, support for XP Themes, groups & list style and full color customization.

DotNetMagic is available with full source code, 12 months of updates and 12 months of email support. It is Visual Studio 2005/2008 compatible and comes with C# and VB.NET samples.

### Solutions Schedule for .NET V3.0

Build team management and resource planning solutions.

- Share schedule, appointment, contact, location and task information
- Supports timebar linking, cell-level formatting, multi-select timebar and more

Solutions Schedule for .NET

Solutions Schedule for .NET allows developers to create scheduling solutions such as those found in the healthcare or services sector. Solutions Schedule for .NET includes intuitive mouse driven scheduling and planning with Gantt-style project management features. Other features include independent cell formatting, timebar overlap, split and linking

styles. You can easily add a visual reference point for the current date and time in a schedule by using the Current Time Line feature. Time lines extend vertically through the schedule area and are drawn along the major time segments. Developers can also add zoom-in/out capabilities by programmatically changing the value of the TimeDistance property.

### dBarcode-2D DLL - Universal V5.1

Create most common barcodes from within your application.

- Generate barcodes directly from within a variety of development environments
- Allows bar thickness, bearer bars, margin indicators, human readable text and text position to be adjusted

dBarcode-2D DLL - Universal

dBarcode-2D DLL Universal consists of a 32 & 64 bit DLL and full sample source code illustrating the writing of barcode applications in Visual Basic 6, VBA or C/C++. Each unit enables the developer to set the code, code type, data, size, orientation, background and foreground colours all from within their application. Each unit generates both a pattern string for bars and spaces

and a metafile picture containing the barcode image and (where enabled) the code text. The picture may be displayed, printed, saved or passed to the clipboard by the user's code.

dBarcode-2D DLL Universal supports Aztec, DataMatrix, GS1-Databar, Maxicode, PDF417, Micro PDF, QR Code and Micro QR Code barcodes.

## Global Majic Software

### Instrumentation ActiveX Library V3.5

Provide visual gauges for technical applications.

- A suite of instrumentation interface controls
- Provides full control over instrument properties
- Very simple and intuitive to configure

Instrumentation ActiveX Library

Instrumentation ActiveX Library is a suite of 11 common instrumentation interface controls including Angular Gauge, Knob, LED, Linear Gauge, Numeric LED, Odometer, Percent, Selector Knob, Slider, Strip Chart, and Toggle. Each component gives you full control over instrument properties including scales, captions, tics, etc. Angular Gauge allows multiple

scales, needles, captions and tics. Linear Gauge allows multiple scales, knobs, captions and tics. Numeric LED allows you to build your own digital clock with an easy-to-use alpha-numeric component. Odometer offers a numeric display similar to an automobile odometer or tripometer. Toggle switch control has bitmap and sound playing capabilities.

## Inabyte

### InaCalc.Net V3.02

Enable advanced calculations in your accounting or spreadsheet application.

- Integrates expression parsing, evaluating, and dependent formula recalculation
- Includes custom function support and multiple formula recalculation

InaCalc.Net

InaCalc.Net supports conventional math operators and functions and is suitable for heavy-duty number crunching. It also supports other data types, such as string, date-time and logical and comes with operators and functions for these data types. It allows defining variables and sets of related formulas that implement spreadsheet-like recalculations. The InaCalc.Net

component integrates expression parsing, evaluating and dependent formula recalculation. It is useful in two general areas; when a formula has to be defined, and evaluated at runtime.

The product supports spreadsheet-like multiple formula recalculation, as well as custom function support and virtual variables.

## Graphics Server Technologies

### Graphics Server .NET V4.0

Add rich charting functionality to your .NET applications.

- Includes data binding properties for Windows Forms and ASP.NET
- Bind to data sources created in Visual Studio at design time
- Includes FunnelVertical chart type and DigitalClock widget

Graphics Server .NET

Graphics Server .NET provides a comprehensive, flexible solution for adding graphs, charts and widgets to both Web and Windows applications. Graphics Server .NET includes features like drilldowns, 'live charts', mouse events and built-in statistical features. It lets you add sophisticated graphs and charts in just minutes with the Interactive Designer. Chart types include: pie (2D & 3D), doughnut, line

(2D & 3D), 100% stacked, area (2D & 3D), horizontal bars (2D & 3D), 100% stacked, pareto, vertical bars (2D & 3D), bubble (2D & 3D), candlestick, high, low, open close, volume, range, funnel, Gantt, multi-segment, polar, radar, scatter etc.

Server licenses are not required and distribution is royalty free.

## Indigo Rose

### Setup Factory V8.0

Create professional installations using a clear visual design environment.

- Wizard based creation of installation packages (no coding needed)
- Code editor for advanced developers to 'fine tune' installations
- Extensive customization through actions library, themes and skins

Setup Factory

Setup Factory offers developers a solution for creating flexible installation systems without needing to learn a proprietary scripting language. It further sets itself apart by providing the customization and advanced control features that developers require, all from within the Setup Factory Visual Design Environment. You can even deploy your applications on

Web servers. Setup Factory contains a scripting engine that offers all the usual programming logic such as loops, functions and arrays and more. It includes an action wizard that makes it easy, even for someone with zero programming knowledge to simply click to add actions. Also included is a script editor that makes it easy for advanced users to edit code directly.

## Keyoti RapidSpell Desktop .NET V4.0

Integrate spell checking functionality into your .NET and WPF applications.

- Interactive dialog checking
- Includes support for 3rd party components
- WPF support includes dialog based checking of WPF's TextBox and RichTextBox controls

RapidSpell Desktop .NET

RapidSpell Desktop .NET allows you to add "as-you-type" spell checking to any textual application (email, word processor etc.) with a couple of lines of code. It can also be used in non GUI contexts using its spell checking API.

RapidSpell Desktop .NET provides 3 spelling components; RapidSpellDialog (dialog based checker control),

RapidSpellAsYouType (as you type check control) and RapidSpellChecker (core spell checker class).

RapidSpell Desktop .NET includes 140,000 word U.S. & U.K. dictionaries (and user dictionary), multi-threaded GUI and a suggestion engine. Additional dictionaries are available for other languages.

## Neodynamic ThermalLabel SDK for .NET V1.0

Design barcode labels and print them to Zebra Thermal printers.

- Barcode printing support for 64 linear/1D & postal barcode symbologies
- Can be used in any .NET language such as C#, VB.NET or managed C++

ThermalLabel SDK for .NET

ThermalLabel SDK for .NET is a lightweight class library (DLL) that lets you design barcode labels and print them to Zebra Thermal Printers (any printers supporting ZPL or ZPL II languages/emulators) by writing pure .NET code in VB.NET or C#. ThermalLabel SDK can be used for designing and printing simple to complex label layouts supporting

text, barcodes, graphics, images, tables, grids, lines and AutoShapes like circles, ellipses, rectangles. It generates native ZPL (Zebra Programming Language) commands based on the Label definition and sends them to the printer. You can print all barcodes supported by your printer as well as other additional standards provided by ThermalLabel SDK.

## Lassalle Technologies AddFlow for WPF Professional V1.0

Quickly build flowchart enabled WPF applications.

- Create flowchart and workflow diagrams interactively or programmatically
- Includes graph layout algorithms - hierarchic, orthogonal, series parallel, tree, radial and more

AddFlow for WPF Professional

AddFlow for WPF Professional allows the creation and the manipulation of two-dimensional diagrams (a.k.a graphs). An AddFlow diagram is a set of objects called nodes (also called vertices or entities) that can be linked each other with links (also called edges, arcs or relations). These diagrams can be created programmatically or interactively.

AddFlow for WPF Professional lets you create: workflow diagrams, database diagrams, communication networks, organizational charts, process flows, state transitions diagrams, CTI applications, CRM (Customer Relationship Management) applications, expert systems, graph theory, quality control diagrams and more.

## NETRONIC Software VARCHART JGantt V2.3

Add interactive Gantt diagrams to your applications.

- User interactions such as create, delete and drag & drop activities are handled by the component
- Includes zooming and scaling of diagrams

VARCHART JGantt

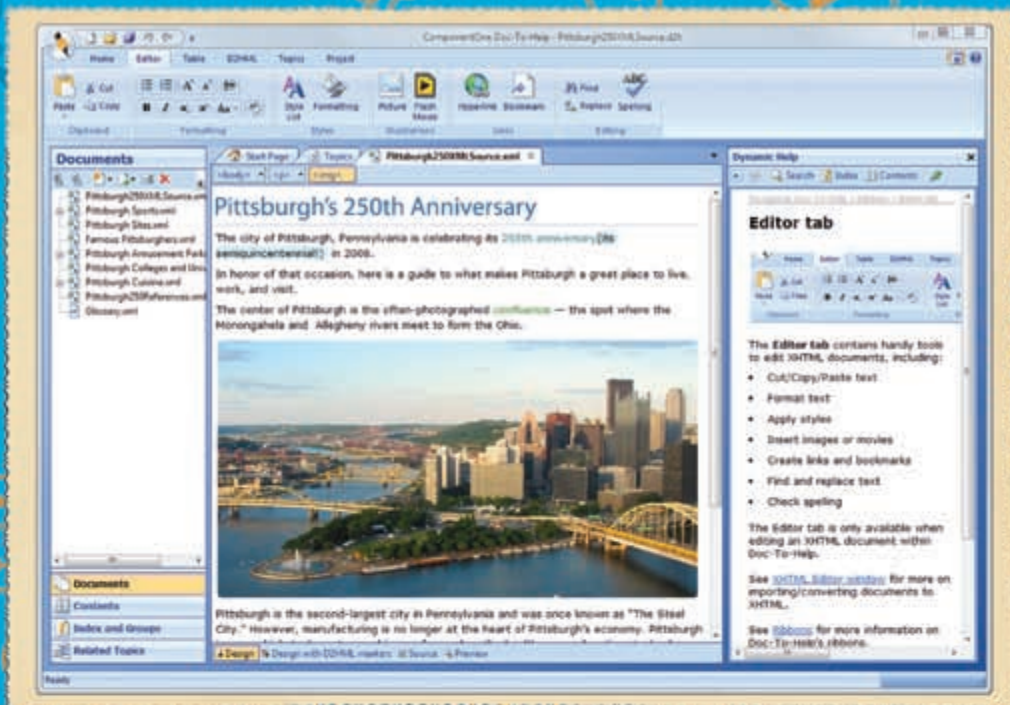

VARCHART JGantt is a component written in Java, that easily lets you integrate Gantt charts into your application. Activities in a chart of VARCHART JGantt can be displayed either by a variety of pre-defined bar shapes, or can be composed from scratch. Any shape and pattern is available, even dynamic bars that actively grow or diminish to indicate

the degree of completion of an activity. Bars can also be connected by links of different types. Vertical and horizontal grids can be placed in the Gantt graph and the time scale can be customized by position, scaling, colors and font.

Settings to define the appearance and behavior of the Gantt chart can be defined at design time.

## Finally, a Documentation Tool that Doesn't Forget the Developers

ComponentOne® Doc-To-Help® is the only tool that helps developers and writers work seamlessly together to create deliverables that include Help, printed manuals, reference documentation and more. Unlike most documentation tools, Doc-To-Help includes technology specifically designed for the developer.

- Embed context-sensitive Help in your applications and allow technical writers to perform topic mapping visually
- Generate automatic reference documentation with Microsoft Sandcastle
- Author documentation in your favorite environment (e.g., Microsoft Word, Adobe Dreamweaver, or Doc-To-Help's new built-in XML-based editor)
- Publish web-based Help, HTML Help, Help 2.0, and more

You get all this in one box! Imagine having one package that makes documentation simple for both the developer and the technical writer.

## Newtone ImageKit.NET V1.0

100% native .NET image processing component.

- Load and save images to a variety of image formats
- Apply various imaging effects and transformations and display those images in various controls

ImageKit.NET

ImageKit.NET lets you add image processing to your .NET applications quickly and easily. You can retrieve images from TWAIN scanners and digital cameras; load & save image files in a variety of formats; apply image filters and transformations to your images; display images in the display, pan window or thumbnail controls.

ImageKit.NET supports a variety of raster and vector file formats and compressions. Native .NET support

includes: BMP, JPEG, GIF, TIFF, PNG, WMF and EMF. ImageKit.NET includes many image effects and transformations including: creating or copying images, combining images, layering images, copy and paste images plus numerous effect filters including blur, mosaic, outline, emboss, oilpaint, canvas, glasstile, lens, ripple, whirlpinch, waves and motionblur. ImageKit.NET contains components for both Windows Forms and Web Forms applications.

## PDFlib PDFlib+PDI V7.0.4

Create PDF files from within server-side or client-side software.

- Includes functions for creating text, graphics, images and links
- Adds full support for LZW-compressed TIFF and GIF images
- Incorporate existing PDF pages in your generated output

PDFlib+PDI

PDFlib+PDI is a development tool for PDF enabling your software or generating PDFs on your server. PDFlib+PDI offers a simple-to-use API for programmatically creating PDF files from within your own server-side or client-side software. PDFlib+PDI doesn't make use of third-party software for generating PDFs, nor does it require any other tools.

PDFlib+PDI includes all PDFlib functions, plus the PDF Import Library (PDI) for including existing PDF pages in the generated output. PDI allows you to add text, images, barcodes and more to existing PDFs.

PDFlib+PDI is available for all major operating systems and development environments.

## O2 Solutions PDFView4NET V2.3

Add PDF viewing to your .NET applications.

- Supports the displaying and printing of PDF files
- Includes a separate library for converting PDF files to images and for printing PDF files to any Windows printer without any UI

PDFView4NET

PDFView4NET is a .NET toolkit for displaying and printing PDF files in .NET applications. It includes a PDF viewer control for Windows Forms and a .NET library for rendering and printing PDF files from any .NET application.

The PDF viewer control for Windows Forms includes support for annotating

PDF files, bookmarks navigation, adding and removing file attachments and other features. The toolkit includes its own PDF rendering engine and it does not rely on any other software for rendering and printing PDF files.

PDFView4NET toolkit has been developed entirely in C#, being 100% managed code.

## plexityHide.com GTP.NET V3.2.1

Add interactive Gantt charts and scheduling to your applications.

- Supports AJAX with client-movable and resizable time items
- Features asynchronous collision detection and handling of time items
- Security awareness enables deployment on XBAP or ClickOnce

GTP.NET

GTP.NET's overall goal and purpose is to let you visualize and manipulate time based information. GTP.NET includes a collection of user interface components which handle time blocks. The time blocks are displayed in a Gantt chart or a schema view. The times are connected to an owner, for example a person or an activity in a project. You can also use it to display dependencies and collisions between

times, which gives the end user a graphical way to view and modify the project.

GTP.NET includes the ability to select and re-assign links and also provides databinding for links between time items. The components can be delivered via WinForms, AJAX, ASP.NET, and even in reduced trust environments like ClickOnce and XBAP.

# PureComponents

## PureComponents Ultimate Suite

A suite of over 79 user interface components.

- Create application user interfaces with the MS Office 2007 style
- Includes components for navigation, data entry, treeview, listview & Ribbon user interface

PureComponents Ultimate Suite

PureComponents Ultimate Suite is a set of 79 .NET WinForms components including grids, Ribbon, navigation panels, buttons, textboxes, comboboxes, listboxes and much more.

PureComponents Ultimate Suite also includes a set of components designed to show and manipulate date based data and information. It features RichCalendar - displays dates in weeks, DatePicker - Combobox to choose the date, MonthSelector - to select a particular month, TimePicker -

Combobox for displaying and choosing the time of day, Roster - to display events, plus many more.

PureComponents Ultimate Suite is compatible with Visual Studio 2005/2008 and includes VB.NET and C# examples. It comes with a subscription which includes all versions and updates released within 12 months of your purchase, plus free product support. C# source code for all included components is available.

# Resco

## Resco MobileForms Toolkit 2009

Suite of .NET CF controls for Pocket PC, Smartphone & Windows CE.NET.

- Includes grid, calendar, listview, input form, zip compression, navigation and touchscreen signature controls
- Now features a chart control with five chart types

Resco MobileForms Toolkit

Resco MobileForms Toolkit is a suite of components designed specifically for mobile devices. It includes advanced designers, support of quick data loading, standardized mobile user interface, Enterprise samples and many other features.

Resco MobileForms Toolkit contains Resco AdvancedList .NET, Resco AdvancedTree.NET, Resco CompactChart .NET, Resco DetailView .NET, Resco SmartGrid .NET, Resco Zip .NET and Resco OutlookControls .NET.

All Resco MobileForms Toolkit components have been specifically designed so they fit the small displays of mobile devices perfectly. Special optimizations such as Resco DelayLoad technology ensures performance is optimized even on devices with limited memory and processor capabilities. It is fully integrated with Visual Studio .NET. All UI controls are available from the Visual Studio Toolbox and Help files are integrated into the Visual Studio Help system.

# Raize Software

## Raize Components V5.1

Build professional-looking Delphi and C++Builder applications.

- Integrates into CodeGear RAD Studio 2009 IDEs (including Delphi 2009 and C++Builder 2009)
- Component designers simplify the task of creating a user interface
- Designed for reuse and extensibility

Raize Components

Raize Components is a collection of more than 125 native VCL components for use in Delphi and C++Builder. Raize Components includes a large selection of visual components for you to choose from, each designed for complete flexibility via an extensive set of interfaces. In addition to the core set of controls, Raize Components includes more than 100 component designers

focused on simplifying user interface development.

Raize Components comes with complete source code for all components, packages, and design editors at no additional charge. Documentation is provided in an extensive context-sensitive online help system.

## Crescent QuickPak V4.5

Visual and performance enhancements for Windows applications.

- Custom calendar, combobox, data entry and presentation controls for ActiveX applications
- Easily access the power of the Windows API

Crescent QuickPak

Crescent QuickPak is a comprehensive collection of 32-bit ActiveX components that can be used to develop applications that will reduce development time and increase productivity. Crescent QuickPak includes the following custom controls; calendar display, caption, enhanced frame and checkbox, extended command button, enhanced combobox, form enhancement, hypertext, frame and option button, data-specific input edit controls, enhanced list

boxes and additional display controls. It also includes functions to open, read, and parse IIS log files, convert log files to HTML tables, and get and set IIS properties in either the local or remote system registry. It has low-level routines for fast performance. Crescent QuickPak also has high-level methods such as financial and statistical routines, file operations: searching and encryption, copying on wild card specifications, file access routines and error-handling.

## Seekford Solutions .NET DNS MX Wizard V3.0.2

Query Domain Name System (DNS) Servers.

- Verify email addresses by looking up the domains MX records
- Asynchronous and Synchronous methods provide greater control of how you want to implement the functionality

.NET DNS MX Wizard

.NET DNS MX Wizard is a class library that lets you query a Domain Name System (DNS) Servers for Mail Exchange (MX) Resource Records (RR) and other types of queries. MX RR's contain the name of the server responsible for handling mail for a domain. You can also use multiple DNS server's for faster and more robust queries. Most DNS queries are

supported, including the basic IP to Domain names and Domain Name to IP's query. The control gives you complete control over the data by letting you access all the returned MX servers, their preference level and automatically giving you the preferred server. The class can also automatically detect the local machines DNS Server.

## SourceGear Corporation SourceGear Vault V4.1

A compelling replacement for Visual SourceSafe.

- Offers full integration into the Visual Studio .NET environment
- Includes an Eclipse client
- Client/Server communication over HTTP or optionally with SSL

SourceGear Vault

SourceGear Vault is a version control system for Windows developers, with complete integration into the Visual Studio .NET environment. SourceGear Vault is implemented entirely in the .NET Framework and uses SQL Server for its repository storage. SourceGear Vault is designed specifically to offer a seamless transition from Visual SourceSafe and includes an import tool which can be used to migrate data from a SourceSafe database into a Vault repository; every version of every file

is imported, including all the history. SourceGear Vault's basic architecture is a centralized Vault server which manages one or more repositories. It includes several client applications and also provides a way to create custom clients using any .NET language.

SourceSafe users can begin using Vault with no learning curve. The terminology is the same, and all major VSS features are present.

## VSoft Technologies FinalBuilder V6.0

Automated build and release management solution.

- Integrates with version control systems/Source code repositories
- Includes a broad range (600+) of action types that cover almost any task you might need to automate

FinalBuilder

FinalBuilder is an automated build and release management solution for Windows software developers and SCM (Software Change Management) professionals. Use FinalBuilder to define, debug, maintain, run and schedule reliable and repeatable build processes. FinalBuilder's user interface has been carefully crafted to make it as easy-to-use as possible. Anyone in your team can use FinalBuilder to automate tasks. You can compile applications from source code, compile setup

installer programs, work with version control systems, handle versioning with ease, create and edit INI files and Windows registry keys, burn CDs and DVDs, or create CD/DVD images (ISO images), zip and unzip files and other archive formats, run automated testing, FTP files to/from servers, send emails, post on news servers, handle errors, run multiple tasks in parallel and dynamically change the build flow, iterate over sets of files and other lists and more.

## All New User Interface Components for 2009!

Cutting-Edge tools for .NET WinForms, ActiveX and MFC

### Calendar

Easily create a scheduling calendar that can manage appointments arranged by day, week, work week or month.

### Command Bars

Office style Ribbons, Command Bars and Menus providing a fully customizable application workspace.

### Controls

Large collection of components to handle many of today's modern GUI development requirements.

### Docking Pane

Visual Studio style docking including tear off tabs and auto hide windows to help organize your application.

### Property Grid

Visual Studio style Property Grid to easily create a hierarchical list of editable properties and data types.

### Report Control

Outlook style grid to create, group and sort data in a flat or hierarchical format easily bound to a data base.

### Shortcut Bar

Office Shortcut Bar menu similar to the navigation panel seen in Outlook to help organize your application.

### Skin Framework

Application skinning framework technology that can apply a completely new skin to your entire application.

### Syntax Edit

Sophisticated text editor supporting advanced text block grouping, syntax colors and line numbers.

### Task Panel

Customizable Task Panel similar to what is seen in Office, Windows Explorer or Visual Studio's Toolbox.

CodeJock's SuitePro can be used with any ActiveX container including .NET, Visual Basic, FoxPro, Delphi, WTL, Microsoft Office, OpenEdge, HTML, Microsoft Solomon, Visual Dataflex, Small Talk, eDeveloper, Clarion or Microsoft Access.
